Thread: [Recreate software](#)

K???er - July 25, 2019, 4:21 pm

I lost the project files of my own software from my shop. Need it to be remade. Hit me up with a PM if you can do this.

MavenGradle - July 25, 2019, 4:22 pm

Any details such as the language they were written in?

Yeah, sorry about that, just noticed it. I'm new here, see.

Shoot me a PM with the link and any details such as obfuscation techniques if you know them.

Edit: That wasn't the challenge I was hoping for :/

You Can re get them by using a software call recover file manager or something like that if you have accidently deleted your project file ! Already Worked for me :)

No obfuscation, it was just a matter of recreating the source from EXE which is 2 minutes of work, literally.

If you have not solved the problem, I'm happy to write a program for you and this community. Just send me the user requirements with details and it will be done.

Claw - August 24, 2019, 7:48 pm

Well, if you couldn't solve your problem, pm me with details.
