I had the same problem, I went and downloaded an older version (Snapchat 10.55.5.0) and turned off auto updates in the Google Play store. It's working for me currently but I assume at some point I'll be forced to update.

Seem like they patched it, older version works for me either

I'm kinda scared to use an older version because of the recent ban wave. Is this totally risk free?

I'd highly suggest investing in snxp, I'm looking forward to buy it too, but I can't contact PornFlakes yet.

HQ Pack(s) and HQ App.

Why are you advertising your shit on this thread?
