Thread: [Posts on threads not showing](#)

hdhd - July 26, 2019, 6:49 am

Hello staff.

I have noticed the past weeks that when i reply to some threads my post wont be added to the thread for about 30 mins to several hours, but when i look at the section posted in i can see that i replied, but when i enter the thread, my post is not there and i will be directed to the first page of the thread.

Any idea what is going on? :)

Regards hdhd

Is it a long thread? It's a bug we can't pinpoint and have not fixed we believe is in relation to cache on the server and normally it's on larger threads.

hdhd - July 26, 2019, 9:59 am

Its 14 pages , but you might be right since i posted in a 1 page thread yesterday and my post was shown instantly.

Thank you for the answers and have a good weekend. :)

So it has about 400+ replies? That's large enough for the bug.
