You also have the potential to earn more if you invest but you dont have to

This is the first method that I have found that actually works. I mainly like it because Im quite lazy so doing things with minimal effort is in my nature lol

Plus the paying \$15 for this is great as within a day you basically cover what you would have payed to get this method

Also wanted to mention that the seller themselves is really nice and is willing to answer any questions you may have

Thankyou for this method 4RJ4

Here's my review:

Ease of use This method is insanely easy to use and only requires a few moments to setup. From there it's pretty much autopilot.

Investment There is an option to to upgrade which could help with this method, one option is about \$15 a month and one is around \$40-\$50.

Originality I've never seen this method before however it's not really original or unique.

Final conclusion(s) This is a really simple method that takes seconds to setup and anyone can do it, If I was given the option to know this knowledge for \$15 I'd do it as it's something I'm now going to do for the foreseeable future and I'm sure it'll make a bit of money.

How much time does it take to get the first 20's and which methods can be used to withdraw the money?

Does it work in any country?

Does it involve mining or use CPU power?

Does it need a computer to be online?

Within a day you should be earning \$20 per day. Paypal for withdrawal. Works in any country.

It doesn't involve much CPU power, but yes your PC must be on.

I have made some money not much yet but this is mainly due to me not really setting up the method till later on it was like 2AM haha

I know that I will get there as I can see the amount of money that is being earned. Im obviously not trying to give the method away but you can see how much you are earning at a time

Would you mind providing proof of your own earnings with this method? Does this work in any country?

ZeroOne - August 5, 2019, 5:42 am

I'm interested in this method.

Does this work anywhere in the world or is it restricted according to which country you're in?

Are there multiple payout options?

According to your previous replies, this is not related to any referrals or mining. Would you mind sharing anything about this method that would make us less skeptical?

Is there a money back guarantee if the method does not work?

The method is advertised as 100% autopilot, would I make more money if I didn't leave it on autopilot?

A proof of your earnings would encourage us more as well.

Made a payment this morning and updated the contract, still waiting on a response

Sibil - August 6, 2019, 8:43 pm

Here is my Initial Review after reading the guide:

It is 3 pages long and it is not very detailed, just basic lines;

It is not that easy to setup, especially if you never used that niche before(I'm lost in space as I never dealt with this before); It is not completely autopilot, there is manual work involved;

You need to dig yourself and find your own "tools" to start; After some digging I found out that ban rates are pretty high. You can reduce that by purchasing some private "tools", but that is no guarantee either;

Most probably you need proxies and not public ones;

* I did not ask OP's help yet, but will do as this is a new domain for me and have no clue on how it works.

I will keep you updated after I set this up and finish digging. This will probably take me a while...it is not 10 minutes setup...

jeremyrem - August 7, 2019, 5:01 am

???WARNING???

This is a very old, very saturated method which will result in a ban within hours.

It is also a publicly available method which you could find free of charge on this forum very easily.

The seller claims to have written the eBook himself but the payment proofs from the guide are from 2015 and have been used in other creations of this method as well as his method could be considered copy/paste from those public guides.

The name of his method is exactly the same as a post on another forum as well.

? This method will leave you with a BANNED account - within hours of start

?I have also opened a dispute and check it for proof of public links to the same method as well as proof of not working/account bans
