Thread: [Factory resetting iphone with lock](#)

bad actor - July 29, 2019, 2:47 am

I work at a river floating place and there's been a lost iPhone 8 for about 9 months now and no one came to claim it so my boss gave it to me. I want to reset the phone without the risk of lost iPhone mode turning on. Is this possible at all?

Swift Shawen - September 17, 2019, 12:36 am

Of course, it is possible. According to your actual condition, iTunes and iCloud may not work for you. However, you can use Siri or an iPhone passcode unlocker to help you. Siri can work to reset a locked iPhone running on iOS 8.0 to iOS 11. If so, you can use it. Another method is trying an unlocking program like Joyoshare iPasscode Unlocker. It can reset the unlocked iPhone with just 3 steps and support all iOS device models and even the iOS 12.4. Hope these two solutions can be useful to you!
