Thread: [Browser Game Giveaway \(test our game to win\)](#)

BitCrasha - July 29, 2019, 4:52 am

Hi all, I have a pretty unique game in development coming to browser primarily but will also be mobile (browser) compatible.

It is essentially a clicker game, but a very unique clicker game that's classed an MMO where you can interact with every single player quickly and efficiently. It's definitely an unheard of concept and should hopefully bring out users competitive sides. It will be quite the strategists game especially as it is updated more and receives planned implementations.

How is this a giveaway? Simple. There will be rewards for the top 5 highest ranking players within a 14 day period from launch. To clarify for the sake of this thread, there is no investment or anything of that nature needed. Nothing more than being paid to play our game!

#1 - \$75 BTC
#2 - \$50 BTC
#3 - \$25 BTC
#4 - \$10 BTC
#5 - \$5 BTC

All users showing interest will be sent a mass PM as well as being quoted for the notification of launch.
