Register here

<https://www.xmpp.jp/signup>

Login through pidgin

there is many other xmpp servers like exploit.im etc

You guys are treating him pretty badly, have some respect for the guy. Here's a step by step guide buddy.

You can sign up here:

<https://www.xmpp.jp/signup>

Then download pidgin.

<https://pidgin.im/>

Once installed:

Click Accounts -> Manage Accounts -> Add

Select XMPP from drop down menu.

Enter your username you signed up with, then add: "xmpp.jp" to the 'Domain' textbox. Finally add your password.

Leave resource blank and you can put any Alias you want such as your user here.

Enjoy. ?

He may be a total noob, he asked for a step by step break down and all you did was spit your dummy out and use the Lord's name in vain and send a link.. How does that help? All because you feel better than him because he asked a question which seemed easy for you.

People like you are the reason HF has fell so far down-hill. Back in the day people used to help people out, not judge them for seeming less intelligent than you.

Enjoy your -rep. Hopefully you learn a lesson from it.
