Apex legends, League of Legends or Overwatch? I personally prefer overwatch among all of this. because the play is amazing and the characters are too.

League!

Overwatch is okay, Apex was okay but the battle royale genre needs 2 die.

These three games are so vastly different, I can't say I could compare them like that. If I needed to choose, apex I guess. Feel like I might as well be comparing cake, soup, and seafood.

Why you spamming everywhere with this? This is a gaming topic... not for crypto.

I'd take League of Legends over the other two. I think Overwatch is a great game, but I don't see myself improving like I do on League. BR games aren't my thing, so Apex is out from the get go.

League is prob good for long term, apex and overwatch shortterm fun
