Thread: [Renting an HVNC](#)

AsianAndy - July 30, 2019, 6:47 pm

Looking for someone who has HVNC for rent or where I can find one.

I dont think you can do it from scratch for \$1000 or \$2000, maybe you will extract from tinynuke or compile some other Git open source code, am I right? I already tried few developer and no one ready to do this from scratch. Specially for latest browser.

+1 hahahahahaha

Not to mention that the vnc library has it in git. Then we are back to the same thing, they still have an existing code and now, I am a CODER. ? ? ? ? ?

Thanks the warning. I think you are right. He tried to sell something to me but he refused any kind of escrow. Clearly act like a scammer. Deal with caution!

HAHAHA, you liar piece of shit. You not let me in your server, you give me a login to darkrat panel, i not change anything, and if somebody change it has no any sense, just an empty panel. You just lie and simple tried to scam me, i want to pay with escrow, you refused, thats it. Go play with your toys you pathetic hermaphrodite.

Obviously scammer stay away from 'AsianAndy'

This makes you look like a fool. You never even suggested a legitimate escrow in the first place. You suggested some indian scammer escrow site at first. Then I definitely didn't trust you. YES you did fucking change my password, I had to go into my phpmyadmin and change all my passwords because it only happened after YOU logged in lol.

He want to sell me a hvnc, he sent me login to panel of dark loader, but i not ask it. I asked him for escrow. bitify is a legit site, but he told me he not trust, its okay no problem, i asked him for alternate escrow site, he refuse any kind of escrow. Come on, this kid is try to scam obviously.
