Hi, I believe those planets and that fireball wasn't done by you correct?

Because I saw them being used in UIXNinjas work.

Other than that, I'll give you 5/10 for the effort of the layout.

I would give 8.5/10 if you've done the illustration work.

Actually i've created everything from scratch

and everythings are original

thank you.

I'll back Slyther on what he said. Nowadays everyone seems to be a better layout designer than a graphic designer. Any proof this is yours?

lol, yes if you can pay for it i will send you the psd/ai files.

i'm just posting this thread here to take feedbacks from high skills designers not for giving proofs
