I'll keep this short...

Currently the best method right now is shout-outs and to automate your story viewing to the Max! You can use really any program out there.

I also forgot, powerlikes and of course comment groups/pods, but I don't bother much with those.

What do you mean with "automate your story viewing"? view people's stories?

Yes exactly.

You put in targets (Pulls in all the followers of certain specified IG accounts) Then from there it automatically views all those Follower's stories IF they have a story uploaded, that is.

You'll get a boat load of more profile visits because people always check who views their story so they may see your name or business' name and wonder who you are thus going to your profile.

Real shout outs, or do those bulk ones actually work?

That's interesting. Should be worth a shot

I never really thought about viewing peoples stories to get more people to look at your profile, seems effective for profile visits, but whats the ratio on followers being gained from that?

Viewing people stories ? Never thought about that.

Well, do we have any bot in place for that ?

In terms of automatisisation, can you recommend specific tools for the specific tasks such as auto views/likes, follow/unfollow etc? Paid is no problem.
