Thank you a lot guys for your words and your help as well. I really appreciate it.

For those commenting on the amount of reps given, they should now that everyone who tried for the award had an amount like this. I am happy that I got a great part of my popularity as a result of my communication with members. This is what differentiated me from others who tried and resulted in me earning the award.

BTW as for the title, lol, it indeed made me laugh

That is pure hate. People had been telling me some irrational things after I earned that award.

Explain me how I bought rep.

If you mean the contest I may had earned like a net amount of 5 reps from it. Almost anyone participating had repped me irrespectively of the contest. I hosted the contest in order to give back. For the same reason I hosted a lottery.

So you accuse me of spamming? Lol

You could do this if you had left like 50 reps given in the last month.

But you left much more. Also I won the award because of the help of people I know on HF and supported me. That differentiated me. Your possibly spammed more than me. Every member who repped me received a rep from you after some time lol

Isnt that spam?

Anyway, I don't care about what you did, it is up to you.

I have just to respond.

And in essence you have a positive rep from me while have a negative from you man :/

I've given out 181 reps less than you in a month.

and i lost to you by 9 rep.

that should put perspective on how much u helped.

if i had repped 181 people more, and modified the popularity 6 times in a week, then i think i would've won by far

i didn't spam anyone with rep, and if i left it, i didnt modify it 6 times

and also i didn't spam send 5/10 bytes to every single post i see saying "nice username" expecting a rep

You have misunderstood me.

Of course I know you possibly have logs since you are an admin. I am talking seriously about having updated your popularity 2 or 3 times. These don't include the 1st time of me adding the rep. If you could check the logs I'd love to know the number of times I changed it.

Additionally, I didn't use any software / script. I have no knowledge on coding. All of my efforts were manual.

You can check my posts. I guess I have almost 0 in the coding section. I have some in the market place asking for software development though.

Edit: if there is a way to prove I didn't use any scripts I'd like to know about it. I'd love to help you get convinced.
