Thread: [\[Public\] Cosmo - An Advanced Crypto Discord Bot - Add to Your Server](#)

bobismyname - August 1, 2019, 1:41 pm

Hey all! I'm here to post about another one of my development projects that I have been working pretty hard on recently. This is a public discord bot for people to add to their own servers, all completely free! I'm hoping with the addition of Cosmo to many discord server I can gather lot's of feedback, feature suggestions, bug reports, etc. so that I can continuously improve this bot.

Click here to check out the [cryptocurrency discord bot](#) and add Cosmo to your server!

Documentation can be found here: <https://bitbucket.org/astronautdotgg/cosmo/wiki/Home>

If you enjoy the usage of the bot, please vote for the bot here:

<https://discordbots.org/bot/538953009376526339/vote>

Suggest new features and report bugs here (we are working on these DAILY, please provide feedback!):

https://docs.google.com/forms/d/e/1FAIpQLScVbZ09pVejCshiBOiNckU5wHF5uICEgWBCbetkPYso mhinfQ/viewform?usp=sf_link

That being said let me hop into some of the features and respective commands:

Please note that a <> indicates a required parameter and <?> indicates an optional parameter. Default exchange for all commands is Binance. In addition the default prefix is '-' however you can set your own custom prefix for your server by running the command '-conf prefix set <newPrefix>'.

Chart Embedding

This feature allows for easy embedding of tradingview charts in your own chat. Simply use the command to indicate any details you want. The command supports nearly every indicator and candlestyle available on tradingview. For a complete list, please refer to documentation.

Command: -chart <symbol> <?exchange> <?timeframe> <?candlebar> <?indicators> or -c <symbol> <?exchange> <?timeframe> <?candlebar> <?indicators>

Examples: -c ethbtc binance 1d, -c ada bittrex 1h renko rsi, -c xbt bitmex 4h bb macd ema

Price Fetching

This feature grabs the current price of a given symbol on any exchange. Default exchange is Binance, aside from XBT which is Bitmex. Price is shown in both satoshis/USD, as well as the 24h price change.

Command: -price <symbol> <?exchange> or -p <symbol> <?exchange>

Examples: -p xbt bitmex, -p mtlbtc binance, -p eth

News Fetching

This feature fetches all the upcoming events (and ongoing events) for a given coin. The result will contain a list of events in the near future, their date, the amount of time left until the event, a link to the source, as well as a rating of whether it is reliable and trending.

Command: -news <coin> or -n <coin>

Examples: -n xlm, -n cardano, -n bitcoin, -n eth

Orderbook Depth

This feature will give a visualization of the current market order book depth for a given coin on an exchange. This will tell you how much BTC worth is in the order book for a certain price point.

Command: -depth <symbol> <?exchange> or -d <symbol> <?exchange>

Examples: -d ethusd coinbase, -d xbt bitmex

Volume Checking

This feature let's you know how much volume is being traded on a given exchange for a symbol.

Command: -volume <symbol> <?exchange> or -v <symbol> <?exchange>

Examples: -v ada binance, -v btc coinbase

Market Heatmap

This feature displays a visual heatmap of the 24hour changes of all coins on the market, as well as their dominance in the market.

Command: -heatmap or -hm

Volatility

This feature displays the volatility index of certain coins, as well as an indication of which direction the coin is moving in.

Command: -heatmap or -hm

Butter - August 1, 2019, 1:55 pm

Yeah man... Looks legit...

Can I use it for wagerr?

Yuccy - August 1, 2019, 1:56 pm

Very awesome, thanks for the release. going to check this out

edit:

[Screenshot by Lightshot](#)

not letting me invite to any server

bobismyname - August 1, 2019, 8:13 pm

not letting me invite to any server

You need to be the server creator, as in the owner of the server to add it to a server. This is directly through discords platform and will only list your data owned server.

Brother, I am :). still not giving me an option. hmmm weird

bobismyname - August 5, 2019, 6:35 am

Pushed out a few bug fixes to Cosmo this morning!

bobismyname - August 6, 2019, 4:21 pm

Major updates to Cosmo including new commands and bug fixes!

<https://astronaut.gg/blog/cosmo-updates-new-commands-and-structure/>

bobismyname - August 12, 2019, 7:35 am

Got in a few bug fixes with chart syntax this weekend :)

dfuid17 - August 12, 2019, 8:26 pm

very nice and useful bot!

1eye - August 13, 2019, 4:04 am

So you just copy pasted a bot? neat i guess?

I did not copy and paste anything lol, this bot was 100% written by myself and a friend. That bot you posted isn't even public, so I'm not sure how you would expect me to copy the source code when it is not available to the public. These both offer functionality that is useful, just because each bot has a charting command doesn't mean they are the same thing - that is a common feature people ask for. I would say this bot is pretty neat and different, I guess.

the bot is open source in closed groups

its kinda public and its too much alike to not be the same bot

and if you actually coded it yourself its embarising since u then copied someone else his idea without improving it

bobismyname - *September 16, 2019, 8:16 am*

Pushed out a few bug fixes today with charting!

bobismyname - *September 22, 2019, 12:32 pm*

Did a memory update to our server, Cosmo should be functioning a lot faster on chart generation now.

Stanley - *December 28, 2020, 1:09 pm*

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
