I really enjoyed reading through this, some of it was quite basic, which is good if there are any new people here, but I liked the information on completely removing accounts, etc. And fake name stuff like that.

Really recommend this to people who have just started using computers (not sure how you'd be here though lol) or if you are just as curious as me.

What is the issue youy are having? If it is website based i could move the download over to another form of file download service?

Kind regards,

Fluox. ?

Update to thread design and E-book done, make sure to check out the new update.
