Thread: [C# / .NET Reversing / Cracking Service | Is Your Program Secure?](#)

EliteEmperor - August 3, 2019, 9:17 pm

Hello, I am pretty new to HF so I thought I would start off by making this post to help programmers who want to sell their programs. My service is beneficial since a lot of programs nowadays can easily be cracked or reversed. To prevent this I will attempt to crack your program and if I do successfully I will give you pointers and recommendations on how it can be improved. If I do not I will report back with what I was successfully able to remove and if anything needs to be changed. As of now this service is completely FREE however I am only accepting programs that are coded in c#. Thank you for your time.

If you would like to contact me drop you discord or pm me and I will add your or reply.

Nice guy, worked with him with my program "TwitchNET" and pointed out some weaknesses and answered any questions I had.

Free service if you're selling or going to sell your program I recommend him.

Would recommend to anyone who wants to test out their obfuscation and receive advise on how to improve their obfuscation.
