Thread: [Keyloggers like Limitless or Hawkers or Predator pain?](#)

maxlifted - August 4, 2019, 6:44 am

Hey guys, I am looking forward to buying a keylogger as good as limitless/hawkeyes/predator pain of the old. A keylogger as stable as those ones with all features working flawlessly including the ftp delivery option. Please, pm me if you know of any.

Does any one else have link to a good keylogger? Not some rubbish advertised as keylogger.

Good virus = Cheap, is not a good equation.
a good coder will take good money for his hard work.

UncleDonald69 - August 31, 2019, 5:23 pm

i know a keylogger once runned antivirus cant detect it its running...but problem is at first place its detected i want someone to crypt it for me in doc or any other exploit making it FUD at first place once its running its fearless i swear and that keylogger is very much into keylogger packs but people hardly test Edge log and neptune project are also good keyloggers but they die once antivirus is back running.
