(May 16, 2020 08:20 PM)backlash4 Wrote: [\[CITE\]](#) My Personal Review so far:

I purchased access to Lucy about a day ago. This is an excellent indicator in the sense that it has a much higher success rate than failure rate (this is something that I determined by looking at previous calls made by Lucy over the past month). I myself am new to trading, but between Deadbit's recommendations and Lucy's calls/'signals' to enter, I feel extremely comfortable making trades with my actual money.

As for the owner Deadbit, he is full of knowledge when it comes to trading, and he has a passion for money management. He will explain any trade to you and will be there to support you via calls and messaging.

Overall, so far this was definitely worth the \$297. This isn't some kind of signals services that offers a 85% winning rate (ha), but rather a script that maximizes your gains while minimizing your loss + the knowledge of an owner who knows what hes doing.

9/10 (9 because I did have some lag time receiving alerts to buy/sell from Lucy but nothing that impacted my profit drastically).

(Aug 13, 2019 01:56 PM)R E S T L E S S Wrote: [\[CITE\]](#) I've just been testing it with a demo balance before I commit to using Lucy bot with my real money. On a \$50,000 starting balance, I have made \$26,914.38 profit in about 12 hours. Obviously this isn't always going to happen and can likely be put down to luck in choosing the right pairs etc... but Lucy made the right calls which gave me enough confidence / knowledge going into it in order to enter. Lucy definitely provides you with a lot more insight and the seller is extremely helpful and patient and answers any and every question in a huge amount of detail, also providing a lot of outside resources to beginner traders in order to become more familiar with trading strategies and associated Jargon.

Definitely would recommend this, I'm going to keep playing around with the demo balance for a few more days and then I will move onto trading with my real money. I'll post another review in a couple weeks that will be to do with my real money trading experiences.

At the moment Lucy does not provide auto-trading.

She's a tool that helps guides your trades, so you should still use proper risk-management to ensure you stay profitable during your day.

Those free indicators only look at EMA (moving averages), RSI, or MACD information to signal a buy/sell. They are prone to false signals. Lucy looks at a bunch of other info as well and then interprets it to spot opportunities in the market.

I've reached out to you to schedule a demo.

Lucy stays winnin'. Here is one of her calls from this morning (August 7, 2019)

Anciety - August 7, 2019, 10:29 am

OP gave me a really good demo, very detailed and explained an awful lot to me.
Lucy looks very promising and users with a larger amount of capital can definitely capitalise on this.
Not to mention Lucy also works with FX if you purchased the tradingview version
This is an amazing catch for scalpers who want to increase there returns
Will update further down the line if I purchase for myself

Thanks for the tip Juicy.

If you are a busy individual, day-trading may not be for you. Especially in the crypto-market where things happen occur so quickly.

As mentioned previously, I view Lucy as a tool to help with the trading process. Human judgement along with assistance from algorithms is the best route.

As I mention, proper risk management is required to achieve these returns.

Even if you messed up though, you would have made at least 4-5% today following her calls.
With a 10x leverage, that's a 50% increase on your account balance.

SIM-1567847 - August 14, 2019, 6:10 pm

Lucy absolutely killed Bitcoin. Her initial entry price was \$11,300, and continued to call short position entries all the way down.

Members who went in on that made 140% profit provided they utilized a 10x leverage. This is more than doubling your portfolio.

Someone also pointed out to me her results on ADA/BTC. Over 20% raw gains in 4 days (200% using a 10x leverage).

Hence why the Chart Indicator is \$497/mo. Using it, you can find opportunities for: crypto, stocks, forex, commodities, etc.

Hi,

It's my 1st post here but I am not new to algo trading / bots & stuff like that. However, I am not best when it comes to TA. How would I know which calls I should follow and which are false ? If using leverage, decisions like these must be made quickly and without second thoughts.

Aside from the demo, do you offer some sort of trial? 1 day / 6 hours ? That would be really nice for someone like me to test it out. Can't drop hundreds \$ on a product I haven't tested myself honestly.

Cheers.

SIM-1567847 - August 24, 2019, 9:08 am

Here's a preview of how the Chatbot signals work.

It's connected to a bot that relays information from Lucy's Chart indicator to give us an update on the moves of BTC/USD.

At August 23 at 3:50pm EST, Lucy switched to a Downtrend Short Entry on Bitcoin, price was \$10,423.

Today is the morning of August 24 and the price of Bitcoin has broken support and is now sitting at \$9,953.

Whether you're interested in trading multiple markets, or only BTC/USD from Lucy, you can schedule a demo with her to understand the full scope of this tool.

The asking price is too steep for me. Need an honest review from a member before I even consider subscribing.

Lucy's killing it as always, had some productive demo calls today and glad to welcome all new members to the team!

SIM-1567847 - May 14, 2020, 11:40 am

Lucy's performance on XRP/BTC was spot on! 65.1% profits for members that took the call. Here's a look:

Hi Bit,

- Do you have a Discord or Telegram group? (vouches, guide, etc).
- How much is the min. investment you recommend to start?
- Need to have previous experience in trading?
- TradingView(based on script) send notifications or need to be looking at chart all the time? Need to get upgraded plan?

Im really interested, but based on my almost 0 knowledge on trading, i need be certain about.

Thanks!

Hi there!

- Yes we do, a private Slack group is there for support related inquiries.
- I recommend at least \$300-500 to begin trading with. With trading, you are looking for percentage profits. The more you trade with, the higher those percentage gains translate into dollar amount.
- Previous experience is always better than none - however we have multiple beginners in the group who are learning as they trade with Lucy.
- TradingView, this is based on a script. It will send notifications to your mobile phone so you do not need to be looking at chart all the time. This does require the upgraded TradingView plan which is \$14.99/month, however they offer a free trial for 30 days

If you have any other questions, feel free to ask! I'm here to answer :)

Amazing call today on GBP/USD! A big tip that we give to all our members is to cut your losing trades early and let your winning trades play out.

This is a perfect example of that. Whoever entered would have made 78% using a 10x leverage ?

Thanks for your answer Bit.

Will try to get into next month.

So there is no Discord public channels?

Just to keep track on your service.

Thanks

My Personal Review so far:

I purchased access to Lucy about a day ago. This is an excellent indicator in the sense that it has a much higher success rate than failure rate (this is something that I determined by looking at previous calls made by Lucy over the past month). I myself am new to trading, but between Deadbit's recommendations and Lucy's calls/'signals' to enter, I feel extremely comfortable making trades with my actual money.

As for the owner Deadbit, he is full of knowledge when it comes to trading, and he has a passion for money management. He will explain any trade to you and will be there to support you via calls and messaging.

Overall, so far this was definitely worth the \$297. This isn't some kind of signals services that offers a 85% winning rate (ha), but rather a script that maximizes your gains while minimizing your loss + the knowledge of an owner who knows what hes doing.

9/10 (9 because I did have some lag time receiving alerts to buy/sell from Lucy but nothing that impacted my profit drastically).

Hello there!

In a nutshell, yes. Lucy is set-up on specific markets/pairs that you pick, and it will give you signals automatically.

If you have time, I'd be happy to run you through a product demo.

Hi Hilrey,

Charts display recent price on a set timeframe. Although they may seem intimidating as a beginner, they're completely understandable with some learning.

I'm happy to explain if you would like. You can reach me via Discord:

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Hey Xepher,

Yes, you have missed it for this month. New memberships are closed for now. We do this to ensure ample support for all our paid users.

You can join the waitlist to be notified when it re-opens, thanks!

SIM-1567847 - June 2, 2020, 9:31 am

Had a couple members join the waitlist.

That is the fastest way to be notified when spots open up.
Thanks all & stay safe!
