Is it actually? PornFlakes seems to be doing great for sales but I don't have any need for this as the downgrade method works just fine, anyway GLWS OP.

i built the app from that source code yesterday and it has the same interface like yours, coincidence much? lmao

anyway it sucked, its not spoofed and shows "by creative kit" or whatever name u named the app.

theres still a way to bypass tho, gl finding it out.

Yes I know theres a way to bypass I've stated this millions of times on this thread it has the same layout but the code is a lot different these are what it's built on though... I fixed the by creative kit and got rid of it and alot of other stuff. These people are just stupid and like to sales trash. When I used the public code my snapchat got banned so that's why I checked the code and fixed it up because it has a lot of flaws. Just know that they're competitors they also sell snap score and that's why they're upset.
