I am doing this purely because i no longer have a job so It'll be super cheap because i need the money.

Flat rate of \$10 for everything.

Any amount of money

any Rank

Any stats can be edited. (K/D, Money earned on jobs, literally any other stat in the game)

I have a Paid Mod menu meaning its not as easily detected, but with all things there is always a small chance of a ban. especially if you go crazy and spend 2 bil in a day and rank 30000

Just add me and we can do it in game or give me your account and can do it that way

I'm guessing you're just using Wardens? If you guys are looking to do GTA V modding, I do recommend Wardens.
