Thread: [\[FREE\] uProxy Tool v.2.02 | A Multi-Threaded Proxy Grabber](#)

Here is uProxy v.2.02

uProxy is a tool with this tool you can scrap proxies, grab them from a proxy list resource, also you can check your proxies. These proxies are good but not too good so that you can use them in Netflix cracking. These proxies are public proxies so won't work in Netflix cracking. But you want to use them with other checkers that works fine with public proxies also then this tool is best for you. It has an easy interface so no need much explanation about how to use this tool. I think it's pretty simple to use this tool.

NO LEECHING

and creds to Nikola Tesla for links

Just a question: can we know why you are sharing this instead of the author of the program?. He shared version 2.0 on 21-April-2019, and he has thousands of posts and good reputation, and also the version 1.81 of uProxy only popups news about version 2.0, nothing about a version 2.02.

I definitely will not download uProxy it from this source. Thanks anyways if you have good intentions and this is not a fake.

Honestly Im just trying to get more reputation on here as I just started this account but ive been lurking on this forum for ages. Its not fake btw, theres a clean VT scan on the thread. All good intentions, creds to the original author, etc. Thanks for the informative comment man but you sound kinda pissy today. Take it down a notch lol
