I asked this guy for a vouch copy of Malwarebytes mac since the one I use is just free version. He gave me one but it didn't work on mac, only on windows. I told him that and he was kind enough to let me choose another one to replace. I asked for a gaming account that'll work on my mac, he gave me not one, but two of them. He's really a nice guy, and from what I can see, his prices are really low which is really great.

I hope this will last for long, if you need something cheap, you can ask this guy and he'll give you something for an affordable price!

To summarize, I got Malwarebytes for windows (not mac) and two gaming accounts that work on mac. Thanks again Stewart!
