Thread: [some motion graphics I can't even use](#)

Herbert - August 11, 2019, 12:48 pm

been working on this piece for about half a day now.

sadly I can't use it as signature the limit for gif files is 500 kb

tried to optimize it, this is the best I could do (still ~2-3 MB)

Spoiler [\(Click to View\)](#)

Spoiler [\(Click to View\)](#)

kinda sucks.

lesstech - August 11, 2019, 12:50 pm

Sweet I saw you making this before our bytes deal. Looks gucci

Linux X - August 11, 2019, 9:59 pm

Which one you want to optimize? The first one is almost impossible to make it under 500kb without losing some of the quality.

managed to fix it

oRequiem - August 13, 2019, 3:01 pm

Looks clean and smooth to me, well done.

SkullTraill - September 3, 2019, 4:25 pm

Pretty sure you can optimize it to less than 500kb.

500KB is still pretty small, no?
