Thread: [Disable win defender PERMANENTLY with a .reg file](#)

shypo - August 11, 2019, 4:08 pm

Ummm.. so i was wondering if i could disable windows defender permanently with a .reg file, i have managed to make a batch file that disables it but untill the next restart. Yes ik i can disable it from reg editor but im just wonderinf if its even possible coz i need it to bind it with my rat. if someone has done it i would appreciate if you would tell me the text thing :) ?

edit: I found a .reg file that disables it permanently.

<https://goo.gl/EENWBM> theres the link

NOTE: I did not make this and all credits go to this guy [MDTechVideos - YouTube](#)

Also incase you want to turn it back on <https://goo.gl/yNvsGn>

I hope that this was useful ?

If I understand this correctly, you need to put this file in the startup folder so it executes each reboot.

You are right.

Glory to your outstanding sense!
