Thread: [Vape Mod Suggestions](#)

StickTalk - August 12, 2019, 1:15 pm

I'm looking to buy a new vape mod. Anyone have any suggestions??

I'm currently using a Smok G-PRIV2 which is awesome for what it does and how customisable all the settings are. I highly recommend it!

I'm going to check these out. I'm not a beginner so I don't really want to get a starter kit. But those are really nice.

@n0\$f3ratu\$, I'm going to look into that one. Thanks for your input!

I'm running a Asmodus Lustro and a Vaporesso Cascade - both have matte black finishes and it looks dope.

The Lustro has USB-C charge also. I usually run at either 70 watt on mesh coils or 120 on cotton and they both fire extremely well.

Don't buy a Smok,

I've had bad experiences with them

Smog Mag is my current box and I'm using a prince 12v tank with a modded glass tank to make it have 6ml in at once instead of 3.6

I have a SnowWolf

VFENG-S 230W with a Baby Prince subohm tank.

That is one of the only Smok mods that are quite decent

Just smoke cigarettes like a real man. Cigars on weekends.

What type of cigs do you smoke? Quit smoking big brand company cigs because of health side effects recently. I plan on only smoking cigarettes from Native American Indian reservations though because I heard they're better for your health.

I've heard tobacco from the reservations is really quality tobacco. I was smoking camel cigarettes

All the Smok products are great man !

I have 3 one that took hell of a beating at work every day.

I love my mods man I also make my own ejuice.

I worked at a yogurt factory and the same shit

juice is made with goes in yogurt, vg & pg

I got a cotton candy flavoring man that

I been smoking on the last 2 years

and I use to smoke 2 - 3 packs

every single day.

Yeah me too. Pretty sure John McAfee smokes them exclusively. He also lights up a piece of rice paper (joint rolling paper) and uses the flame to light his cigarettes to avoid the lighter butane from combustion

Hmmm that's good to know. Any information is good information.

Geek vape mod, great strong mod, works well with battery connectivity as well. I have tried over 20 different ones and this one is the best I have had.

Thank you for that. I'll check it out as well.

What bad experiences have you had with them I have 3 and a old school e leaf.
All were very cheap and I had really good experiences with all of them.

I've had 2 break from dropping them about 3 feet.
I'm hard on them.

Anything from Smok or Voopoo is gonna be solid. I use a Smok Mag 225W and a Voopoo drag.
Can't say I prefer one over the other. I have two because I'm a lazy fugg that doesn't want to swap tanks when I want a different juice.
