Thread: [How blackhat can I go with a method in the marketplace.](#)

Like just wondering, obviously not c*rds and shit but I got a method that anyone can make \$1m off easy but I don't know if I can sell it lmao.

Considering that amount i'd say it's something that shouldn't be sold here at all, you are not getting into details as well. If i were you i would've missed that lol

I would avoid selling this here, this is high enough for the feds who are here to actually be interested, as we know they don't really care about low hanging fruit like kids buying rats.

How blackhat is it, on a scale of 1 to 10? 10 being so blackhat it's scary lol. I mean, if you need a second opinion with a potential gain of \$1m then I'm about... but in all seriousness I think it depends on what it entails or who it affects on an individual level more than anything else.

As long as it's not mentioned in the rules then just full fucking send it.

I'd say it's like a 5.

It's technically not.

One million mate. That's almost enough to finance your game.

Almost. Nah only need like 5k really for that.

Guess i'll close this up, maybe i'll let this fish go.
