I've got the cash to splash on a decent method. I will require substantial proof of earnings before we commence the transaction.

Please comment or PM me and we can go from there.

I have a blackhat method working very easily and safe in the USA, for rest of the world it might be difficult to use. Have tried and tested it myself like an year ago. Made a few thousand dollars of it , then I got busy with studies. Tell me if you'll be interested in this.

Method involves payment in paypal. You will need a bit of capital for starting it, the more the capital, more will be the earning. Earning is unlimited, if you want we can both collaborate on this, Ill need help as I don't have much time to execute and manage the method.
