Thread: [Sceptic / UID=4117215 - Faking Earnings](#)

Winds - August 13, 2019, 2:24 pm

I know that it's pretty much obvious that every ebook seller is faking earnings, but this guy isn't even trying.

In [this](#) thread there's this picture:

It is impossible to have 4 figures (or more) in PayPal without a comma or a dot (depends if you're from the EU or the US).

Pretty much, it should've been: \$1,556.24 OR \$1.556,24

I have no idea how people still bought this without noticing, pretty sad to be honest.

Imfao love when users post threads like this

isu - August 13, 2019, 2:26 pm

What a scumbag move! Thanks for an alert!

vyactor - August 13, 2019, 6:13 pm

Thanks for the alert, I hope those people who bought it should be ashamed of themselves already lmao.

SIM-4086413 - August 13, 2019, 6:58 pm

Yeah that is clearly fake, impossible.

"U ACCUSE ME OF FAKING \$1.5K???????? o.O THATS NOTHING ... im in a first world country"
-something a nigerian would say

Android 17 - August 13, 2019, 7:06 pm

People should request a refresh of balance always. That's why I don't post my earnings. I just have those who buy post theirs ?

Thanks for the alert OP.

Don't you get vouch copies for products and leak them on other sites? Think before you call someone else 'scummy'

@OP Pretty sure if you make a paypal in a random ass country and switch the primaray currency to USD then commas don't appear - y'all need to chill out LOL

Mutiny - August 14, 2019, 12:31 am

That's why sellers should have a link to a .gif refreshing the page in my opinion

I mean I really couldn't care less but i'm pretty sure it's true. Feel free to try it out since it seems like you really care about this

You have no idea what you're talking about and it's 100% obvious, now stop being misleading and defending this guy.

Comments like these piss me off the most. Members that are saying pure bullshit without doing a single bit of research should get a warning point for being dumb lol.

Lots of people used to make stealths by hiring users from third world countries to create paypals with legitimate info. Maybe im wrong maybe i'm right, does it matter? Not really. Idk this Sceptic kid and obviously all ebooks are shitty, but if you go to his other method it literally shows him refreshing a \$6200 btc wallet.

So if your argument is that he does not have \$1500, that is false by that, and he did say in a post that he has done thousands in exchanges (also true if you go through his thread history)

Don't take it personally - I have no wish to argue with someone that has spent 700+ hours of his life browsing this website.

Edit: man literally sells an ebook called "PayPal Stealth" if anyone needed to do research it was probably you buddy

Don't go off on making threads on people when you and your boyfriend "Meow" literally vouch each other for EVERY product you sell. False vouching for buddies seems a bit more scummy than "faking" earnings proof - does it not?

I genuinely don't understand what you're trying to say. Are you trying to say that he does have money? Or that he does have the \$1500 that he faked in the thread? Anyways, you added me to your ignore list already for some reason so I can't really see what you're doing on site. What can I say? Keep trying defending this guy like he's your brother or something. You have no idea what you're talking about so I don't even know why I'm wasting my time responding to your nonsense.

False vouching for buddies seems a bit more scummy than "faking" earnings proof - does it not? This man genuinely thinks that "stealth PayPals don't have commas". How fucking dumb are you? EVERY PAYPAL HAVE COMMAS & DOTS and you're just out here posting comments on things you have no idea what you're talking about, and now you accuse me on "buddy vouching" on things that I sell. Which products do I sell exactly lol? I only have 2 threads that are currently active and only 1 of them is vouched by Meow. Fuck off.

Yeah you are right

Refreshing his email with email from coinbase showing \$6200 can be faked in 5 minutes.
I could send myself this email and refresh it. whatever
