Thread: [Mass Wordpress / Joomla / Drupal Site Hacking](#)

simaora - August 14, 2019, 6:40 am

Hi

We are looking for a coder partner to expand our hacking abilities

We have an already made LINUX system that scan and exploit wordpress vulnerabilities (maily through plugins)

Wordpress / Joomla / Drupal / Typo3 - anyone who can penetrate mass amounts of sites can earn the big buck here...

We are looking for a partner / paid expert to expanbd our system abilities and be able to penetrate houndreds of sites automatically.

Are you interested in making money?

please PM me
