Albertino - March 22, 2009, 4:10 am

very nice share, thanks :) lolololol
but a little old I will say :)

Shad~ - March 22, 2009, 4:29 am

(Mar 22, 2009 04:10 AM)Albertino Wrote: [CITE](#) very nice share, thanks :) lolololol
but a little old I will say :)hey albertino, yeah but with with a good crypter/blinder only bit-defender
detect's it xD, GR8 WORK!!!

cantonadinho - March 22, 2009, 4:52 am

on the virus scan it writes Session not exist, use the Saved Report to view your scan analysis
when you want.does avira detect this keylogger?

Shad~ - March 22, 2009, 5:08 am

(Mar 22, 2009 04:52 AM)cantonadinho Wrote: [CITE](#) on the virus scan it writes Session not exist,
use the Saved Report to view your scan analysis when you want.does avira detect this keylogger?i
can assure you its not a virus,
anyway these where the results when i blinded it with albertino's blinder 2.0/mdcrypter (both u casn
get from HF, use search button)

msterrorist - March 22, 2009, 9:28 am
Thanks homie but there better ones from albertino

sciflee - March 22, 2009, 10:11 am
I have a problem, generating the program.

FTP SERVER - ftp.drivehq.com
Ftp username - xxxxxxxxxxxxxxxx
Ftp password - xxxxxxxxxxxxxxxx
upload interval - 30
ftp filename - logs.txt
minium ftp log size - 10kb

keylogger filename - xxxxxxxxxxxxxxxx
default.ico icon
logs name - keys.txt

Everything else, I did not enable since I do not know how to use.

I checked my FTP settings and it sent me the logs which tells me my ftp settings are correct

After I click generate it said it works.

Then when I click compile... it said "Compiling is Failed!! Please check your keylogger settings."

Ricck2 - March 22, 2009, 11:28 am

thanks..checking this one out to compare with Ardamax

Zyx - March 22, 2009, 2:38 pm

we miss your work too :(

Shad~ - March 24, 2009, 9:28 am

hello, if you type in youtube "Albertino keylogger" it will show you the steps there ?

cralle - March 24, 2009, 9:32 am

haha nod32 detects it so bad...

Shad~ - March 24, 2009, 9:42 am

(Mar 24, 2009 09:32 AM)cralle Wrote: [\[CITE\]](#) haha nod32 detects it so bad... funny that..... ? because i crypted/blinded it and it didnt detect it ?

Gizmo - March 24, 2009, 10:00 am

When I try to open the file, it doenst work :\$

Shad~ - March 24, 2009, 10:26 am

(Mar 24, 2009 10:00 AM)Gizmo Wrote: [\[CITE\]](#) When I try to open the file, it doenst work :\$ Giz i know what you've done haha, you have to make a folder in the folder the .exe's in to run it (i said in post)?

(Mar 22, 2009 03:54 AM)eminem200777 Wrote: [\[CITE\]](#) first of all d/l the file then within that folder make a folder called "Keylogger"(thats where it will save your keylogger when its done)
then click on AKC - Final wallar :D

Gizmo - March 24, 2009, 10:28 am

oh thank you very much, sorry to tell you it didnt work :p

thnx for post the keylogger :D <<33

Shad~ - March 24, 2009, 10:29 am

do you have net-frame work 2.0? lol? please give a more detailed post and maybe i can help you ?

(Mar 24, 2009 10:29 AM)eminem200777 Wrote: [\[CITE\]](#) do you have net-frame work 2.0? lol? please give a more detailed post and maybe i can help you ?

sorted out gizmo, anyone else need any help? ?

Sedurnas - March 24, 2009, 12:13 pm

hm i think this doesnt work with drivehq.

I tried it/ doesnt work.

And i cant use 110 mb because the new acc's have no ftp .
funpic/ohost dont work either.

Some other FTP hosting which works?

Thx for help.

Nitricx - March 25, 2009, 12:43 am

1stly a big THX Eminem.... for those posts& links ... i downloaded Albertino's famous keylogger (creator) and also that ms net. file, watched Elbire's amazing youtube tut's - really nice stuff - the music fits perfectly .. but ...i'm still confused how to set it up and test it ... i created another folder but got some access denied msg pretend i'm braindead (probably am) if these these q's sound like: wtf? duh!

1.what is an 'evaluation copy'? is it like a trial version that expires?

2. can i purchase a copy of Albertino's latest keylogger through paypal? if so what do i do, ? pm him? does he have a website to order from?

3. how do i tell if i'm being keylogged? you can pm me if it's not something to say publically i had an email saying someone ("Aaron Out") had added me as a facebook friend and i stupidly clicked on the link and he was not anywhere to be found on my facebook! how can i tell if there was a keylog attached to that link that i clicked on? my av s didnt pick it up but that doesnt mean alot - or maybe im getting too paranoid?

sorry guys - probably all the answers to this are on this site ... but im getting so far behind at uni ever since i got interested in hacking and not getting much sleep ... wish i could study this full time ... thx 4 ur help

peace

momokeylogger - March 25, 2009, 4:49 am

well i set everything and compiled then i opened it on my laptop but it didnt send the logs i dunno y any help ? :/

i got the test message too

min log 1KB

send time 5min

everything is ok what now

88idiot88 - March 25, 2009, 5:03 am

not working for me i downloaded it but they wont open

Sedurnas - March 25, 2009, 6:22 am

(Mar 25, 2009 05:03 AM)88power88 Wrote: [CITE](#) not working for me i downloaded it but they wont open
Why?

You got to create a folger called keylogger befor you start it.

My Question again:

What FTP works with this (cant use 110mb because the new accs have no FTP support)?

Tried drivehq, didnt work ;(

Sedurnas - March 26, 2009, 6:27 am

Worked now!

drivehq.

(Sy for doublepost/ didnt want to wait.)

Gizmo - March 26, 2009, 1:34 pm

I've got a ftp server, 110.mb.com and drivehq.com, but both doesn't work. What do i wrong?

(i did the same thing as turtorial)

Sedurnas - March 26, 2009, 1:49 pm

(Mar 26, 2009 01:34 PM)Gizmo Wrote: [\[CITE\]](#) I've got a ftp server, 110.mb.com and drivehq.com, but both doesn't work. What do i wrong?

(i did the same thing as turtorial)

110 mb doesnt work if its a new Account.

drivehq ->

Create a folder called logs for example:

Run Albertino's

Settings:

<ftp.drivehq.com>

logs

username

password

This works.

Gizmo - March 26, 2009, 2:03 pm

Albertinos keylogger still give me a error, i don't know what i'm doing wrong ;/ hmm.

I did what you said.

Albertino - March 26, 2009, 2:12 pm

make it without http:// or www before ftp server name

Gizmo - March 27, 2009, 2:03 pm

I was trying to send Albertino keylogger to ppl by msn, but msn know it's a virus, how can i make so msn won't see it as a virus? (I already bind the keylogger with a .ico file.)

æ?Žâ©æ^- ... - March 27, 2009, 2:31 pm

Quote:I was trying to send Albertino keylogger to ppl by msn, but msn know it's a virus, how can i make so msn won't see it as a virus? (I already bind the keylogger with a .ico file.)

Put it in a .rar file.

Quote:My Question again:

Tried drivehq, didnt work ;(

Have you tried t 3 5 . com? Without the spaces

Sedurnas - March 27, 2009, 3:10 pm

nope.

But i tried drivehq later again and it worked.

Only annoying thing is that i dont get logs.

Crypted with dizzel's mdCrypter, no logs.

Binded with my RAT and Satans AV killer (and not detected by his AV. He used Kaspersky and i checked that in NVT), no logs.

Maybe it will work with t35 (going to try this next), but would be strange tho.. the testfiles got uploaded on drivehq, but no logs.

Even if i try it myself / shutdown AV/ Firewall.

Shad~ - March 29, 2009, 3:34 am

i crypted it with p/ivy crypter/albertino's blinder and msn didnt pick it up.....further more i dont know why its not sending logs ?

1981992 - March 29, 2009, 4:09 am

Do you guys have any suggestions on what public crypter I can use on it plus a good public binder to bind it ???

1981992 - March 29, 2009, 5:28 am

The file is Infected He binded it with his own keylogger !!!!!
after I ran it I noticed I got a rundll32.exe that is not the System's

I belive he just infected us all can anyone confirm ???

Shad~ - March 29, 2009, 5:45 am

Hey there.

There could be a simple reason why you are not receiving any logs. It could be ..

#1 : The minimum log size is too huge. 10kb by default.

#2 : Your Time interval is too long.

#3 : Your Time interval does not match the Minimum log size.

To prevent these measures you can take this drastic method. Set the minimum log size to 0.1kb and the Time interval to 1 minute. You should see some logs in your FTP server.

Please be aware that by using those settings will result in having Logs of 3-4 lines of text in your FTP folder.

Cheers!
DLeTE

No You idiot dont you know that alot of keyloggers and spyweres use that name as a proccess name to avoid being deleted.....

anyways I found out I had a spywere and it wasnt because of this keylogger so sorry for that post but next time think before you talk.....

P.S.

I get an error when I compile it says something is wrong with the settings or somthing and I tried downloading it again

æ?Žâ©æ - March 29, 2009, 6:26 am

Follow these steps. The FTP website is [www.t 3 5.com](http://www.t35.com) / without spaces.

1) Launch the Albertino Keylogger Creator FINAL - Patched [FUD] application. His website should open up on your internet browser. Change the browser url to [http://www.t 3 5.com](http://www.t35.com)

2) Register a free account with t 35.com

3) When you have successfully login into t 35.com click on the New dir button and create a file name " Logs " without the " quotes "

4) In the application's 1st page. There is the FTP settings. This is what yours should look like for testing with http://t 35.com

Ftp Server:ftp.t 35.com
Remote Folder:Logs
Ftp Username: InsertText.t 35 .com
Ftp Password: InsertText
Upload Interval: 1min
Ftp Filename: Logs.txt
Min size : 0.1 kb

Cheers!
DLeTE

1981992 - March 29, 2009, 6:33 am

still not working same error :
Compiling failed. please check your keylogger settings

æ?Ž&æ™ ... - March 29, 2009, 6:37 am

Restart the creator and do not touch any other settings then the most basic. Other settings meaning the self-destruct and others. Only use everything in default and change the FTP settings only. Leave the icon in default and txt names.

1981992 - March 29, 2009, 7:03 am

thats just what I did still same error

Nitricx - March 29, 2009, 8:38 am

DLeTE - i got a free acc at t35 and when i submitted Logs in new dir - i got this:

"Unable to connect to FTP server ftp.# on port 21.
Are you sure this is the address of the FTP server? This is often different from that of the HTTP (web) server. Please contact your ISP helpdesk or system administrator for help."

i live in australia - is that why i got this msg? is there another hosting site that might work for me?
sorry DLeTE don't worry about above q -- i was able to create the file, thx

Relevant - March 29, 2009, 6:44 pm

little old but thanks for the share

Aldun - April 1, 2009, 8:41 am

Doesn't work for me :O When I click "check FTP settings" it says correct and the file shows up on my FTP, but when I compile it gives an error, and I don't know whats wrong.
My filled in stuff:

Ftp server: ftp.drivehq.com (Hmm, I didnt do http:// in front, however HF puts that in automaticly I think)
Remote folder unchecked
Username: xxxx

Password: xxxx
Upload interval: 5min
Ftp filename: logs.txt
Minimum FTP log size: 10kb

Keylogger settings:

Keylogger Filename: french.txt (as Im sending it to classmates while saying it are the answers)
keylogger icon: default.ico
logsname: keys.txt

Nothing else is filled in or checked.
Whats wrong here? Thanks!

Edit: works now! My mistake was the "french.txt" part. .txt should be .exe :)

Why are you being an ass? back hands you

Glock Phobia - April 9, 2009, 5:14 am

ok guys i gotta a problem - i set up everything, then i run the keylogger to test it and it doesnt send anything to the ftp server ? where is the keys.txt ?????

Melchior - April 9, 2009, 5:23 am

It's in a folder name Keylogger inside AKC.

paloalto00 - April 9, 2009, 5:24 am

(Apr 9, 2009 05:14 AM)krispy Wrote: [\[CITE\]](#) ok guys i gotta a problem - i set up everything, then i run the keylogger to test it and it doesnt send anything to the ftp server ? where is the keys.txt ?????
I have the same problem my friend

Melchior - April 9, 2009, 5:28 am

Look, at the FTP Input filed, key in like this: yourusername:yourpassword@ftp.yourftpserver.com
Then key in also at Username and password field in the keylogger creator.

Example:

FTP : HackYou:YoureHacked@ftp.myhackingsite.com
Username: HackYou
Password: YoureHacked

Then click test FTP connection.

paloalto00 - April 9, 2009, 5:32 am

(Apr 9, 2009 05:28 AM)Melchior Wrote: [\[CITE\]](#) Look, at the FTP Input filed, key in like this:

O.o, Ok gonna keylog myself :D Gonna see if it works

Glock Phobia - April 9, 2009, 6:16 am

in my keylogger folder there is just a file named 'system' i set up the ftp correctly -it sends the test message but then i cant find the keys.txt

Melchior - April 9, 2009, 6:25 am

You should name it into "System.exe".

Note that extension of .exe.

The keys.txt? You mean the test file or the victims log?

I assume you're keylogging yourself, you should check where you save the log at.

Mostly it's at Temp folder or System32.

<Your Computer User Name>\AppData\Local\Temp

Glock Phobia - April 9, 2009, 6:37 am

i mean since i am keylogging myself there should be a keys.txt or logs.txt rite ? none of those is sent to ftp.. and i cant find it on my hard drive .. and thanks for the help.

Melchior - April 9, 2009, 6:57 am

Did the process running correctly?

Generate then compile doesnt mean you're running it.

You have to run the created file.

Please make sure it's running, check your task manager.

MastaZ - April 9, 2009, 7:03 am

is this fully UD? ...

Glock Phobia - April 9, 2009, 11:47 am

now i get it LOL .. u gotta create a folder on the ftp and point it to the keylogger .. i wasnt using one till now :D

But now the problem is it gets detected by antivurs programs .. i tried a few crypters but its still detectable. anyone know a good crypter?

paloalto00 - April 9, 2009, 2:26 pm
