I would advise that you dont use an app go unfollow people. Instagram is a lot more strict now and I believe it isnt safe to use one any more. Although there are several on the appstore just search "unfollow"

I agree. I use an autoclicker macro and I can hardly unfollow 400 a day.

i found an app that shows me people who dont follow back, but then i have to manually unfollow them through the actual IG app; any way around this
