I've been given the chance to vouch for a copy of [censored] Ebook, so here's my honest review:

The Ebook is written in 30 pages which are very easy to read, organized and provide screenshot's to help to understand what's being discussed, and what you should look at when applying the techniques.

There are two main topics as described, Doxing and Detracing, both well covered and easy to

understand even if you're a newbie in these areas.

Inside the ebook are mentioned a lot of websites, services and tools which are super useful for these matters so, buying this Ebook will not only give you the explanation on what you need to do in order to DOX someone, or hide your traces but also will spare you a lot of time searching for good services that will help you during the process.

I'm not a complete noob in these matters and I think this Ebook it's worth the price especially if you're interested in creating a good learning foundation on these matters! If you're already an expert this might not be for you but there are still very good tips for you to improve your modus operandi.

PS: also includes a bunch of extras to help you organize yourself, some are mentioned in the ebook, some are not, but everything is well described!

The classification I will give to this ebook is considering that you are a beginner and you want to get a VERY good start learning Doxing and Detracing.

My final rating for this Ebook: 8.5/10

MonsterPrograms - August 20, 2019, 6:26 am

My honest review of [censored] eBook:

The detailed 30 page eBook is written very well and easy to understand, covering a variety of methods for both doxing and detracing. There is an overview page at the beginning, and everything is super organised in this eBook. There are screenshots, and links which are provided in every method along with detailed explanations, making this eBook newbie friendly. There are also other resources which can be found in the Extras section (some of which are not described in this eBook, but still super handy).

In conclusion, I recommend this eBook to people who do not have much experience in these areas. If you have the budget and want to learn the fundamentals of doxing and detracing, this will be a best buy.

~Vouch Copy~

This is by far one of the most detailed eBook's I've ever read. It has over 30 pages of fully detailed pages on showing how to dox someone or prevent yourself from getting doxxed/detracing.

The eBook gives out many free sources and tools on how to maximize getting someones information or detracing your own.

The eBook is also very detailed, very well organized and easy to read. Grammar is awesome and even someone who doesn't have english as their first language can understand it.

There will be no need of buying external doxing services or any other things since this basically the all-in-one handbook you need and will teach you all the tricks and everything you need to know to get your targets information or just trying to stay anonymous online. ?

Extra's section/links section on the eBook is very nice and is very easy to use. The website is also very clean and elegant.

This eBook is definitely worth the \$25 it asks for and for all the detail and guidance you'll become a pro in no time. ?

My overall / final rating of this eBook is a 10/10. Amazing detail and grammar. Lots of pages and lots of things to discuss with, it also uses a website instead of having to download something which is much more simple and modern and with extra things such as the links and sources this eBook with no doubt deserves the 10/10!

Thanks for giving me the vouch copy!

I'm reporting this since I've been asked for ways to translate it by non fluent English-readers, as it isn't possible.

It's for security reason, no PDF will be provided.

Ombra - December 5, 2019, 4:54 am

Ombra - January 11, 2020, 12:57 pm

In the event in which a new version of CyberDox will be released, all existing customers will get it free of charge. Updates are included in the price you pay ?

Ombra - January 12, 2020, 4:09 pm

I'm still processing transactions manually and accepting BTC/ETH only. Unfortunately my PayPal is still limited and I have yet to fix it.

Ombra - January 15, 2020, 7:03 am

Yesterday I had some connection issues and couldn't check my mailbox for contact requests. I have just handled them all, sorry if I took slightly more than 24h this time.

Ombra - January 18, 2020, 9:15 am

CyberDox is completely noob friendly. It is ideal for users that have none to little experience with doxing and would like to learn more about it.

Ombra - January 20, 2020, 4:10 am

Until autobuy will be fixed, I have to deliver CyberDox and my other products manually. My apologies for the inconvenience but in any case, it takes far less than 24h to receive your product.

Ombra - January 21, 2020, 11:10 am

Protecting your personal data is important. That's why Detracing techniques are covered at the end of the guide.

My review: Take what i say with a grain of salt, as I have never doxed anyone before, but I have been familiar with most of the information gathered in the E-book (but not everything, as some information was extremely helpful/educational). Some information came with learning exploits and some came with hunting down leads for sales prospects for either personal use/to sell. Either way I am probably more seasoned then some people on the forums, this is just my honest review.

The doxing portion is very helpful as if you are COMPLETELY new to information gathering. This will be a good first step. Learning what you can from a piece of information and thinking how you can use the information gathered to link to something els related to the person is key. The E-book goes in depth (without going into detail as respect to the creator i will be super vague) it kind of follows this line:

" Person A on Forum-x > has the same username and Icon with an email public on Forum-y > Person A also owns a website > using this method you can find Person A's email / phone number. If this failed this might work- ECT "

Detracing was something I was interested in after researching it, as i had never thought about clearing my foot prints, just minimizing footprints in general. Pumping would really be the only good example into detracing (as defined how I saw it when described) that I took notice too. The majority of the end chapter on detracing is general knowledge of staying anonymous while surfing the web or interacting online (good habits people know but don't follow)

The price of the E-book seems a little high in my opinion when it comes to the information given. Most of methods/ knowledge displayed are very easy to learn by yourself if you have the time/drive

to research and learn. Some of the information that I took away was very knowledgeable so I am satisfied to an extent. I believe if some more information was given on some of the topics you steered away from and/or added examples of doxing someone (maybe a forums member with consent) using the methods given it would be a huge plus, especially to someone who is brand new coming into the scene.

In my personal rating I would give the book 7 /10

This book probably isn't for you if you are technically inclined in virtual tracking but if you are absolutely brand new to gathering information on someone and want a huge step in the right direction this would be a great first step in the right direction.

again take what I say with a grain of salt, the seller was amazing and friendly.

the only real solid complaint I have is lack of table of contents (Example: chapter 2: Doxing pg.5) . As the E-book is 30 pages, I still catch myself coming back to review information i was unfamiliar with but having to guesstimate which page the said information was on.

Thank you for the knowledge gained and good luck in future sales ?

(Feb 14, 2020 12:42 AM)Nexius Wrote: [CITE](#) My review: Take what i say with a grain of salt, as I have never doxed anyone before, but I have been familiar with most of the information gathered in the E-book (but not everything, as some information was extremely helpful/educational). Some information came with learning exploits and some came with hunting down leads for sales prospects for either personal use/to sell. Either way I am probably more seasoned then some people on the forums, this is just my honest review.

The doxing portion is very helpful as if you are COMPLETELY new to information gathering. This will be a good first step. Learning what you can from a piece of information and thinking how you can use the information gathered to link to something els related to the person is key. The E-book goes in depth (without going into detail as respect to the creator i will be super vague) it kind of follows this line:

" Person A on Forum-x > has the same username and Icon with an email public on Forum-y > Person A also owns a website > using this method you can find Person A's email / phone number. If this failed this might work- ECT "

Detracing was something I was interested in after researching it, as i had never thought about clearing my foot prints, just minimizing footprints in general. Pumping would really be the only good example into detracing (as defined how I saw it when described) that I took notice too. The majority of the end chapter on detracing is general knowledge of staying anonymous while surfing the web or interacting online (good habits people know but don't follow)

The price of the E-book seems a little high in my opinion when it comes to the information given. Most of methods/ knowledge displayed are very easy to learn by yourself if you have the time/drive to research and learn. Some of the information that I took away was very knowledgeable so I am satisfied to an extent. I believe if some more information was given on some of the topics you steered away from and/or added examples of doxing someone (maybe a forums member with consent) using the methods given it would be a huge plus, especially to someone who is brand new coming into the scene.

In my personal rating I would give the book 7 /10

This book probably isn't for you if you are technically inclined in virtual tracking but if you are absolutely brand new to gathering information on someone and want a huge step in the right direction this would be a great first step in the right direction.

With this guide you can learn doxing and detracing techniques which are both useful when surfing the internet. By one side you will learn which traces you leave behind you and how to hide them, by the other you will learn how to find other people traces and follow them.

This guide covers two main topics: doxing is the main one and it's the one that comes with more

pages and explanations, on the other side there's detracting, which has been kept with few final chapters but I deemed important to discuss in any case.

Ombra - December 5, 2020, 7:40 am

You will be provided with update as long as the product is being distributed. This is what "lifetime" means, if for any reason I have to shut the guide down and stop selling it, updates won't be provided anymore and you will keep it as it is.

Ombra - December 6, 2020, 8:48 am

Please note that my products are not replaceable. I cannot provide you with a different product after you've got access to the one you purchased.

Ombra - January 23, 2021, 9:29 am

You don't have to wait for me to be online in order to buy, the HF Contract Template (button at the beginning of this thread) contains an autobuy link that you can use even if I'm offline. System will receive your funds and deliver product once transaction reaches enough confirmations

Ombra - January 26, 2021, 3:47 am

Everyone leaves traces while surfing the internet, this guide will teach you how to identify the most common ones and trace them back to its owner.

Ombra - January 29, 2021, 9:33 am

Sorry for those who tried to place orders and got an error from Shoppy during past hours. My stock run out and I just refilled it, you can now try again to buy.

Ombra - January 31, 2021, 1:29 pm

Keep in mind I do not offer doxing services but I'm selling a guide so that you can start performing it by yourself, so please do not ask me to dox your targets or remove your footprints.

Ombra - February 2, 2021, 12:33 am

You will be provided with access to an online reader on my website where you will be able to read the guide. This is done to keep all products digital and stored on my website, so that you can access them all with an unique user profile.

Ombra - February 3, 2021, 12:44 am

If you're an advanced user that knows how to perform doxing already, this guide is not recommended for you. The ideal target ranges from users with beginner to intermediate knowledge.

Ombra - February 6, 2021, 3:43 am

Let me remind that I do NOT offer doxing service. If you wanna learn how it works you're free to purchase this guide, but I won't personally track your targets and provide you with their personal information. I do not want to be involved into this, just provide you with tools and knowledge, then you're free to use them as you desire.

Ombra - February 7, 2021, 4:12 am

If you need support please contact me using only 1 contact method (my website contact form, HF convo, HF PM, business email) as I do check them all at the same time when I login. Receiving the same message may confuse me and slow down your support request.

Serial codes to access Cyberdox have been restocked inside my Shoppy account, you can now purchase again. Sorry for the inconvenience but I have been offline for several hours.

Ombra - February 17, 2021, 1:20 pm

Purchasing with LTC is recommended, rather than using BTC. That's due to incredibly high network usage (and transaction fees) at this time.

Ombra - February 18, 2021, 1:39 pm

Ombra - March 4, 2021, 2:41 pm

Cyberdox will teach you both doxing and detracing basics. You will learn how some sensitive information can be gathered and concealed, even if you are starting without any knowledge about these fields.

Ombra - March 6, 2021, 12:40 am

If you're an intermediate to advanced user this guide may not be suitable for you. It has been designed for people that are moving their first steps into doxing world and wanna get a kick start.

Ombra - March 7, 2021, 7:47 am

I run out of serial codes to get access to this guide on shoppy. I just realized it and proceeded to restock. Sorry for the inconvenience if you tried to purchase during the last few hours.

Ombra - March 8, 2021, 9:45 am

Please note that I do not take PayPal but crypto currencies only. Autobuy supports BTC, ETH and LTC but I can take other ones if you're fine in purchasing manually. Contact me if that's the case.

Ombra - March 9, 2021, 9:47 am

Remember I do not offer a doxing service but a guide to teach you. Do not contact me asking to trace back other people for you as that is something I won't do.

Ombra - March 10, 2021, 9:50 am

You're always welcome to share your feedbacks / thoughts, as long as you are a verified customer that read the whole guide.

Ombra - March 11, 2021, 11:03 am

Please note that you may find my sales threads on other sites. It will likely be me but you're always invited to double check my identity by contacting me here or using my website.

Ombra - March 12, 2021, 1:17 pm

You're recommended to purchase using LTC at this time. Unfortunately BTC and ETH fees are huge right now and you risk to pay a lot more due to this, if you go for Bitcoin and Ethereum

Ombra - March 13, 2021, 1:23 pm

All feedbacks are welcome, feel free to post your thoughts after purchasing (I have to check you completed your purchase before giving you a positive feedback for your deal)

Ombra - March 14, 2021, 3:56 pm

You should be familiar with English before purchasing as texts cannot be selected inside the e-reader used to provide the guide.

I've fully switched my products to Sellix as I've found out it has more features than Shoppy. Contract templates have been updated in all my products

Ombra - March 16, 2021, 4:56 am

Keep in mind I only deal using private messages / convos and emails, I do not deal over Discord or Telegram

Ombra - March 17, 2021, 5:05 am

If you own a Binance account you can contact me to purchase manually. This would allow you to kill transaction fees to 0 as it would be an internal transfer to my own Binance account.

Ombra - March 18, 2021, 6:13 am

This guide represents an excellent entry point to start learning about doxing and detracing techniques. If you feel a newbie you can buy with confidence, there are no pre-requisites at all.

Ombra - March 19, 2021, 6:52 am

Cyberdox comes with free updates and support. Whenever a new version is released you're entitled to obtain it free of charge. Furthermore it will be automatically delivered inside your customer area inside my website.

I've noticed that some services mentioned inside the guide are not available anymore (dead links). They will be replaced inside the upcoming minor update I have to release.

Ombra - March 22, 2021, 11:18 am

Litecoin is the currency I recommend to purchase at this time. If you need help to get some or you only have PayPal, feel free to contact me for exchange instructions.

Ombra - March 23, 2021, 11:36 am

Expect a minor CyberDox update to be released within the following week-end, I have to fix some recommended services with new ones inside the guide. Existing customers will automatically get access to latest version on my website.

Ombra - March 24, 2021, 11:45 am

Please don't ask me for the PDF of this guide. I stopped providing them since 2019, when I decided to release all my guides inside an e-reader on my website

Ombra - March 25, 2021, 12:04 pm

Are you interested in learning doxing / detracing fundamentals? Look no further, with CyberDox you can learn the basic principles and move your knowledge level from newbie to intermediate user.

Ombra - March 26, 2021, 12:32 pm

CyberDox can be purchased with crypto currencies only. Checkout is fully automated and you will receive your order details as soon as your payment reaches 1 confirmation.

Ombra - March 27, 2021, 12:32 pm

Cyberdox does not require any previous knowledge to be understood. It has been designed for beginners and intermediate users, everything is explained clearly and many pictures have been added along the way. Comprehension will be easier than you may think.

Ombra - March 28, 2021, 1:08 pm

ETH has been temporarily disabled as payment method. I found out that on a \$15 payment I personally collect \$5 that are sent to my wallet. That's due to monster transaction fees that makes small transactions not convenient anymore. You can still purchase with BTC or LTC. If you'd like to use other currencies you can contact me privately.

Ombra - March 29, 2021, 1:43 pm

You can check CyberDox feedbacks and vouches inside the first post. They all come from contracted customers as HF rules demand.

Ombra - March 31, 2021, 5:51 am

Cyberdox is currently a 30 pages guide. They are filled with detailed instructions and screenshots, making content extremely easy to understand and apply.

Ombra - April 1, 2021, 6:52 am

Ombra - April 3, 2021, 7:13 am

Litecoin payments are recommended at this time. They're processed almost instantly and require less than \$0.10 as transaction fee.

Ombra - April 4, 2021, 8:55 am

My Sellix account run out of cyberdox copies. I've just added new ones in stock. My apologies to people that tried to purchase during past hours, purchase process is back operational now.

Ombra - April 5, 2021, 1:12 pm

Please do not ask me for guide PDF, I do not provide them anymore since I've in place my personal PDF reader on my website

Ombra - April 7, 2021, 12:08 am

Few links inside the guide are pointing to services that have been discontinued. I'm going to replace them and release a minor update. Existing customers have access to updates without any additional cost.

Ombra - April 8, 2021, 1:01 am

As soon as the minor update will be released, all customers will automatically find it and be able to access it from their customer area. No need to ask for it.

Ombra - April 9, 2021, 4:47 am

If you should ever have any kind of issue with my ebook reader (used to provide this guide) please let me know. So far I never got complaints but I'm always available to improve my work

Ombra - April 10, 2021, 5:39 am

If you have any issue to find your delivery email after purchasing, make sure to check your SPAM folder too. If you don't find it over there you can contact me.

Ombra - April 11, 2021, 7:27 am

Please note that I'm not offering doxing service for hire. I sell this guide to provide you with basic knowledge to understand how doxing works, so that you can start performing it and learn more by yourself.

Ombra - April 12, 2021, 9:36 am

A new product of mine will be released within this week. As soon as it will be released I will work and release the minor CyberDox update announced during past week.

Ombra - April 13, 2021, 10:33 am

You should be familiar with English before purchasing as texts cannot be selected when reading my guides, hence you won't be able to translate them using online translators

Ombra - April 14, 2021, 11:56 am

I'm going to release a new guide within tomorrow. As announced, after releasing this one I will move to update some existing products of mine. Cyberdox will receive a minor update that will be automatically delivered to all customers.

Ombra - April 18, 2021, 8:59 am

Cyberdox is composed by many chapters, 70% of them concern doxing techniques while the remaining 30% is made by detracing (protection) methods. Customers will immediately get knowledge concerning both sides of the medal: attack and defense.

Ombra - April 19, 2021, 9:01 am

Updates are always delivered free of charge, you can purchase Cyberdox at any time but you will always be entitled to free updates without having to pay additional fees.

Ombra - April 20, 2021, 10:10 am

Please don't ask for a PDF copy of my guides as I do not provide them. All my guides are delivered in a controlled environment which is an e-reader on my website.

Ombra - April 22, 2021, 4:03 am

If you face any issue while completing your checkout, please provide me with your order ID so that I can investigate as soon as possible.

Ombra - April 23, 2021, 8:49 am

To begin learning about doxing and personal security online, this guide is the perfect kit to begin. You don't need pre-requisites or any kind of knowledge, everything has been written looking at people that are fresh to this field.

Ombra - April 24, 2021, 9:04 am

In addition to HF contracts, it would be great if you could find a minute to leave your feedback on Sellix.

They use a separate feedback system and sadly it cannot be linked to my seller profile on here, even if I'm full of positive reviews.

Ombra - April 25, 2021, 9:47 am

Using Litecoin to purchase is recommended at this time. You will have to pay no fees compared to Bitcoin as network is currently overloaded by transactions.

Ombra - April 26, 2021, 9:54 am

I'm not available to be hired for doxing tasks.

This is not a service I offer nor want to offer, if you need to learn doxing you can get the guide being sold in this thread

Ombra - April 27, 2021, 10:00 am

Once you have completed Sellix checkout process you will receive a product code that is required to claim the guide on my website.

No direct download link is provided.

Please make sure to send enough funds when purchasing as I keep receiving partial payments and those cannot be processed

Ombra - May 5, 2021, 8:49 am

Cyberdox isn't meant for advanced users. If you're already experienced concerning doxing, you won't find this guide useful unless you want to refresh some ways to trace people and protect yourself.

Ombra - May 6, 2021, 12:12 pm

Before purchasing remember there's a minor update pending on CyberDox. You may find not working links in the guide that will be removed or replaced with the upcoming update.

Ombra - May 7, 2021, 3:11 pm

I'm considering the option to create an additional service, concerning data management, specifically made for CyberDox customers. Stay tuned.

Ombra - May 9, 2021, 12:05 am

If you have any issue while using my e-reader you're free to contact me for assistance.

Make sure to provide your order id or received serial key as purchase proof.

Ombra - May 11, 2021, 6:35 am

If you'd like to purchase with ETH you're welcome to contact me privately. I process those transactions out of Sellix due to huge network fees at this time.

Ombra - May 12, 2021, 12:38 pm

When online I do check all my contact methods at the same time, please do not send me the same message using multiple ones or I won't be able to track your replies

Ombra - May 14, 2021, 3:05 am

You can get Cyberdox to kick start your way to doxing/detracing or to refresh your knowledge if you've been away from the scene for long time. I tried to keep my style as detailed as possible so that newbies can enjoy learning from this guide.

Ombra - May 16, 2021, 1:16 am

XMR, XRP, ETH and other currencies are accepted as payment method but I have to process transaction manually. Contact me if you want to use a specific crypto-currency to purchase.

Ombra - May 17, 2021, 8:29 am

Cyberdox, like all my guides, is not provided as PDF document. When purchasing you'll receive access to an e-reader located on my website, you'll have to create an account to be granted access and read the guide.

Ombra - May 18, 2021, 9:31 am

I do not deal over discord all telegram, my communication methods to ask me questions or get support are private messages and emails, using the contact area of my website.

Ombra - May 19, 2021, 2:15 pm

Everybody leaves digital footprints when doing stuff online. CyberDox will teach you how to recognize and follow most common kinds of traces.

Ombra - May 20, 2021, 2:25 pm

Cyberdox has been structured so that it not only provides you useful information about doxing techniques. It also helps you to reduce your own traces and limit damage if somebody should release a dox of yours.

Ombra - May 22, 2021, 6:02 am

CyberDox does not require any pre-requisite to be purchased. You can proceed to checkout without being worried if you know nothing about doxing/detracing.

Ombra - May 23, 2021, 9:53 am

When contacting me about my products or payments, keep in mind it may take up to 24h to receive an answer. I usually reply within few hours if not instantly, but please do not send me the same message using multiple contact methods before 24h are passed since your first request.

Ombra - May 24, 2021, 2:02 pm

Cyberdox can be read using any device that has an internet connection, you can check the guide using your smartphone too. All you have to do is connecting to my website and you'll be able to access all your purchased products.

Ombra - May 26, 2021, 3:22 am

If you own a Binance account you can contact me to process the transaction internally. Sending funds from your Binance to mine takes no fees.

Ombra - May 28, 2021, 9:31 am

Note that using doxing techniques in certain Countries may break some rules. Before starting to dox other people you should learn about your local laws.

Ombra - May 30, 2021, 1:04 pm

Cyberdox can be purchased using my autobuy shop on Sellix but if you have any issue I can process your transaction manually

Ombra - May 31, 2021, 2:29 pm

You can still purchase at \$15 instead of \$25, which would be the regular pricing for this guide. Take the chance as long as it lasts.

Ombra - June 2, 2021, 12:04 am

If you never paid attention to your online security this guide may open your eyes. We leave many more footprints behind us than you may think.

Cyberdox helps you to recognize, follow and eventually hide these footprints, providing an additional security layer to your activities.

Ombra - June 4, 2021, 1:47 am

Note that if you have any issue when trying to access the guide you can get in touch with me right here or using the proper contact page on my website

Ombra - June 6, 2021, 7:04 am

Coming back to leave your feedback or brief review after purchasing would be greatly appreciated. I will check your order to confirm you're a real customer too.

Ombra - June 8, 2021, 5:45 am

Remember that when doxing somebody you're never guaranteed to obtain results. That's due to the nature of doxing as some people may pay extreme attention to the footprints left behind them, leading conventional doxing techniques to be useless.

Ombra - June 9, 2021, 9:48 am

I would like to remember that this is a basic to intermediate doxing guide, it's great if you're a newbie that want to kick start into doxing/detracing but I do not recommend it if you already have knowledge about performing dox against other people.

Stanley - June 10, 2021, 12:09 pm

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Ombra - June 11, 2021, 12:23 pm

Existing customers are encouraged to use Contact area on my website if they need to get in touch with me. I do not provide support over discord but via email (and private messages) only. This helps me to track your previous requests and answers I already gave you.

Ombra - June 13, 2021, 2:45 am

I do not offer doxing services for hire so kindly do not contact me with proposals of this kind. If you're interested in doxing you can always purchase my guide

Ombra - June 14, 2021, 5:36 am

Note that, as stated inside the guide, doxing is a matter of chances. When starting a doxing process you cannot expect to always succeed in your search. What if your targets are smarter and pay attention to traces left behind them? What if their traces are useless? What if you aren't able to make proper links using information you gathered?

The most important thing to learn is having an open-minded approach to develop the ability to make links and understand how to turn data into useful information.

Ombra - June 17, 2021, 1:31 am

Cyberdox and any other guide of mine is not downloadable as PDF. To read the guide you will have to create an account on my customer website (all you need is an e-mail address) after purchasing to claim your copy.

Ombra - June 19, 2021, 6:55 am

Cyberdox will remain priced at \$15 for some more time. Do not ask me for vouch or discounted copies as I've already reduced price and there's an ongoing offer

Ombra - June 21, 2021, 1:06 am

By purchasing this guide you will gain access to doxing bases. Be aware that this is a guide for beginners to intermediate users and you should refrain from purchasing if you already know how to perform a basic dox.

Ombra - June 22, 2021, 2:24 am

You can contact me if you own a Binance account and want to bypass cryptocurrency network fees. We'd process transaction internally.

Ombra - June 23, 2021, 4:02 am

Note that no doxing guide can guarantee you to succeed in completing a dox. It's a matter of chance as it depends on how many traces are left behind by the person you're doxing and how smart you can be when turning them into useful information

Ombra - June 24, 2021, 9:38 am

If you'd like to pay with a crypto currency that is not listed on Sellix you can contact me and ask to process your transaction manually. I take many more currencies than the 3 listed in my shop (BTC,LTC,BCH)

Ombra - June 25, 2021, 11:53 pm

Since guide is provided inside an e-reader you won't be able to select texts. Make sure you are familiar with English before purchasing as it will not be easy to select content and put it into translators

Ombra - June 27, 2021, 3:40 am

I've been selling this guide for long time and no new vouch copies will be provided, so kindly don't ask for them

Ombra - June 29, 2021, 3:01 am

Note that I do not offer any doxing training or mentoring, all I provide is content inside this guide but I can't really provide private doxing lessons

Ombra - June 30, 2021, 3:37 am

Some links inside the guide went down over time. They will be replaced or removed with the upcoming minor update, just letting you know about it.

Ombra - July 1, 2021, 4:44 am

This guide is ideal if you're a newcomer willing to start learning about doxing. I do not recommend it to advanced users as it has been written for a different customer tier.

Ombra - July 2, 2021, 10:45 pm

LTC is the payment option I recommend at this time due to expensive BTC transaction fees. If you have issues in getting some crypto you can always post or contact me to get suggestions.

Ombra - July 4, 2021, 2:48 am

If something inside the guide is not clear or you have any question, feel free to contact me either via private message or using the contact area on my website. Answers are guaranteed to come within 24h.

Ombra - July 6, 2021, 1:54 am

Sharing access to my web reader (products contained inside it) or any paid content from my website will lead your profile to get product access revoked. If that's the case you won't be eligible to obtain any refund and any open dispute you should open will result as invalid. Leaks are taken seriously.

Ombra - July 7, 2021, 2:02 am

Guide is 30 pages long and content is shown in a noob-friendly way. You will be able to follow and understand what's being discussed without any issue as layout has been specifically designed for this purpose.

Ombra - July 8, 2021, 4:19 am

XMR and ETH are accepted payment methods but those transactions have to be processed manually by me. Feel free to shoot me a private message if you're interested in purchasing with those (or other) methods.

Ombra - July 9, 2021, 11:19 pm

If you'd like to purchase with other payment methods than crypto currencies feel free to contact me. PayPal isn't and won't be an option but on occasions I may take some gift cards or vouchers

Ombra - July 12, 2021, 12:08 pm

CyberDox is meant as basic doxing guide for people that wanna start learning about tracking and de-tracement techniques. Keep in mind that doxing covers the main part of the guide while anonymity techniques are left as final chapters.

Ombra - July 15, 2021, 9:42 am

Cyberdox is sold for educational purposes. Using the doxing techniques shown inside this guide may be legal or not depending on the Country where you're located. In some cases doxing is legal until a certain point while in other ones you may face consequences for it.

Ombra - July 16, 2021, 10:29 am

I'm working on customers website and you may temporarily find it down for a bit, this will be resolved as soon as possible.

Ombra - July 18, 2021, 4:46 am

Please note that some links inside the guide are proven to be no longer available and therefore they will be removed or replaced inside the upcoming minor update that I'm going to release.

Ombra - July 19, 2021, 10:13 am

If you own a Binance account you may want to purchase my products with an internal transfer. This allows both of us to have payment instantly processed with no fees.

Ombra - July 20, 2021, 10:30 am

Understand what kind of traces are left when performing online activities has core importance when it comes to your own protection and anonymity. On the other side it also allows you to investigate about the people hidden behind usernames you met online.

Ombra - July 22, 2021, 5:26 am

Please do not contact me asking for doxing services. Doxing somebody on your behalf is something I don't currently do nor am willing to do.

Ombra - July 23, 2021, 7:32 am

There are no warranties with doxing: your target may be paying attention to traces left behind him or you may not be smart enough to follow them. This guide tries not only to provide you with techniques, but also with a mindset that can be useful when you have data and don't know how to turn them into valuable information.

Ombra - July 26, 2021, 12:51 am

PayPal isn't an accepted payment method as I only take crypto currencies. If you have issues or need help to get some, feel free to ask me for support.

Ombra - July 27, 2021, 3:42 am

Cyberdox techniques are not Country-specific. You can apply them worldwide as Internet connects everybody around the planet. This means doxing and detracing aren't limited by the Country where you or your target are located.

Ombra - July 29, 2021, 3:31 am

If you're not familiar with English be aware that you may have issues when reading this guide. Words cannot be selected and translated due to the secure environment used to deliver the guide.

Ombra - August 7, 2021, 5:18 am

To access my products, including Cyberdox, you have to create an account on my customers website. That is used exclusively to provide you with access to purchased products and support.

Ombra - August 7, 2021, 5:19 am

To access my products, including Cyberdox, you have to create an account on my customers website. That is used exclusively to provide you with access to purchased products and support.

Ombra - August 9, 2021, 1:26 am

Anyone owning a Binance account can send funds to me internally. This will kill fees and lead to an instantly confirmed transaction.

Ombra - August 10, 2021, 3:39 am

This guide isn't Country-specific. I wrote some examples using reference Countries but these can be used worldwide. Keep in mind that techniques may be more or less efficient depending on your own Country and the one where your target is located.

Ombra - August 12, 2021, 2:20 am

In addition to doxing, Cyberdox brings you content about digital self defense. This can be found inside final chapters about detracing. Being able to follow digital footprints is something but you may also want to know how to conceal your own ones.

Ombra - August 13, 2021, 2:23 am

This guide is almost 2 years old but it can still be purchased and contains up to date information, excluding one paragraph that I have to remove. Remember all customers are entitled to receive free

updates over time

Ombra - August 14, 2021, 6:12 am

Cyberdox comes with lifetime updates and support. You can purchase anytime and receive updates for months/years without having to pay any additional fee.

Ombra - August 16, 2021, 4:26 am

Customers will be provided with access to an online ebook reader when purchasing Cyberdox. You will be able to check it using any device with an internet connection, including your smartphone.

Ombra - August 17, 2021, 7:54 am

Doxing requires you to be smart and open minded. Each individual that you want to target will have a different kind of traces behind him, leading you to take a different doxing approach. To be successful, you have to find a way that turns data into information in each case.

Ombra - August 18, 2021, 8:45 am

If you'd like to pay with another crypto currency than the one offered inside Sellix checkout page, feel free to contact me.

Ombra - August 19, 2021, 8:57 am

After purchasing this guide you will be eligible to receive updates and new versions free of charge. This means you'll keep getting more and better knowledge without having to pay more.

Ombra - August 20, 2021, 9:57 am

Remember you can purchase using Binance to save on fees as I have a Binance account and we can transfer funds internally.

Ombra - August 21, 2021, 11:27 am

I do not offer any doxing service for additional money as I do not have time nor interest in doing it. If your target is located in a Country that highly protects privacy it may not be permitted to dox him or it would be hard to find anything useful about him.

Ombra - August 23, 2021, 10:01 am

All transactions are automatically processed by Sellix, you will receive your order details as soon as transaction will be marked as confirmed.

Ombra - August 24, 2021, 10:51 am

Some payments are taking long time to be processed, make sure to send enough funds to cover transaction fees.

I cannot speed up transactions nor provide you with order details while there's a pending transaction linked to you.

Ombra - August 25, 2021, 11:48 am

Bitcoin fees are very low at this time and you can use any currency between BTC, LTC and BCH to complete your purchase. If you'd like to use ETH, XMR, XRP or another currency you can contact me.

Ombra - August 26, 2021, 12:33 pm

This guide tries to teach you not only doxing methods but also a proper mental approach.

You shouldn't expect expect to be successful in your doxing searches just because you know few doxing methods. A professional doxer knows that every target is specific and it's not guaranteed to always find information.

Ombra - August 28, 2021, 12:06 am

Cyberdox has been designed for users with none to limited doxing abilities. Layout comes with detailed explanations and lots of images that can help you to understand what's being explained inside.

Ombra - August 29, 2021, 12:50 am

Don't be scared to make questions if you have any. All posts, private messages and emails will always be answered within 24h. If this doesn't happen you can re-send me your message but it's something that usually is not required.

Ombra - August 30, 2021, 1:27 am

Cyberdox techniques can be applied worldwide without any geographic limitation. They may be more or less effective depending on the Country where your target is located but this is something that always happens when performing a dox.

Ombra - August 31, 2021, 4:02 am

This guide includes chapters about online security, teaching you how to behave and react in case you get doxed and how to limit the chance of being doxed.

Ombra - September 1, 2021, 5:53 am

Guide has been written in English and you should be familiar with it before proceeding with purchase. It won't be possible to select and translate texts.

Ombra - September 2, 2021, 8:18 am

After purchasing you will receive a unique access code that must be redeemed on my website to access the product. You'll have to create an account using a valid email address and your account will be linked to all your purchased products.

Ombra - September 3, 2021, 8:25 am

Guide comes with updates and support. Feel free to contact me either by making a post or privately, sending a private message or email. I will be always ready to provide you with help concerning my products.

Ombra - September 5, 2021, 9:52 am

All purchases are automatically processed by Sellix. You will find options to purchase with BTC, LTC or BCH directly inside checkout page.

Ombra - September 6, 2021, 10:01 am

if you'd like to purchase with specific currencies like XRP, XMR, ETH feel free to send me a private message. I will process transaction manually and provide you with your order details

Ombra - September 7, 2021, 10:35 am

Learn how to follow digital traces and give a real identity to people you met online. Most users are convinced their username is enough to conceal their real ID without being aware of the footprints left behind them. This guide will prove you that following online traces is easier than you may think.

Ombra - September 8, 2021, 10:38 am

I'm having issues with my internet connection, will try to be online as usual but it may happen that I

won't be able to login for 1-2 days. Please be patient if it takes time for me to reply your tickets.

Ombra - September 9, 2021, 10:49 am

Purchasing this guide will teach you doxing and detracing fundamentals inside a single product. You will also see how to reduce the effects of doxing attacks against your person.

Ombra - September 10, 2021, 11:13 am

Please note that ETH is an accepted payment method, along with other crypto currencies, but transaction are processed out of Sellix due to network fees.

Ombra - September 14, 2021, 10:10 am

This is one of the very few guides that will tech you bout actual doxing techniques rather than method to become billionaire in a couple days. If you're interested in learning something that can later be used to protect yourself and make money (as private investigator) this is the right product for you.

Ombra - September 15, 2021, 11:40 pm

When writing this guide I tried to make it as easy to follow as possible. Inside, you will find pictures and detailed explanations that will help you to understand content even if you don't have experience at all.

Ombra - September 17, 2021, 3:06 am

This product has been developed for newcomers and intermediate users. If you're already familiar with many doxing techniques you may not find it useful, unless you're looking for a refresh or potentially learn methods that you missed.

Ombra - September 18, 2021, 9:26 am

Crypto currencies are the only accepted payment method, if you have conversion issues you can contact me and I will recommend you some options.

Ombra - September 19, 2021, 10:45 am

Anyone willing to provide me with feedbacks about the guide and/or recommend anything he would like to learn is free to contact me. I will take notes for future updates.

Feel free to contact me if you would like to pay with altcoins like XRP or DOGE. Those are accepted too.

Ombra - September 23, 2021, 4:27 am

One specific doxing chapter is focused on finding personal details when your target is hidden behind a society. This is extremely useful when using a small business to mask private information.

Ombra - September 24, 2021, 7:40 am

This guide aims to provide you with basic to intermediate doxing/detracing knowledge. You can enjoy reading i even if you don't have any experience as I've worked hard to make it as much noob friendly as possible. Pictures and detailed explanations will help you on the road.

Ombra - September 25, 2021, 8:49 am

Cyberdox is not provided as PDF document, you'll get access to my ebook reader instead. This

allows you to read the guide with any device as you only have to login into my website with your account credentials.

Ombra - September 26, 2021, 9:12 am

Ombra - September 30, 2021, 5:20 am

I am replacing few links inside the guide as some online services either changed their site address or closed.

Ombra - October 1, 2021, 8:32 am

All updates are automatically delivered to existing customers, there's no need to ask for them as old versions are always replaced with newest ones.

Ombra - October 3, 2021, 10:45 am

Semmenial - October 3, 2021, 10:47 am

What makes this different from any free tutorial on the site?

Ombra - October 5, 2021, 2:57 am

The difference between this and other doxing articles/guides is that I put time to select valuable content for users and for this purpose I charge a price.

People can learn about any kind of subject by spending time and making google searches, question is: do they have enough time to spend into this task? If the answer is "no" then going for a paid guide that already collects useful content is the best option on the table.

Ombra - October 8, 2021, 1:31 am

As per my other products sold over Sellix, I've just added Monero as payment option inside checkout page. This means if you'd like to buy with XMR you no longer need to contact me but you can proceed over Sellix and your payment will be processed automatically.

Ombra - October 9, 2021, 4:47 am

When completing your purchase you won't receive a PDF document but rather an access code that must be redeemed on my website. Access codes will grant you access to your purchased products.

Ombra - October 13, 2021, 4:36 am

I've found out that my website has blocked by some AV companies due to the software I sell over there. This also means that my thread designs and images may not display correctly. I'll move them to a different provider so that they will display correctly.

Ombra - October 14, 2021, 9:29 am

Ombra - October 27, 2021, 8:07 am

Ombra - November 1, 2021, 6:42 am

This guide will teach you actual doxing methods that can be applied when you want/need to know something about people you've met online. Trust nobody over internet as creating a new identity is extremely simple and this often leads people to lie about them and their skills/activities.

Ombra - November 2, 2021, 9:42 am

Some Countries might have special laws that may limit your ability to conduct private investigations or use private investigations techniques. Before starting to apply the content of this guide you should make sure about this.

Ombra - June 18, 2022, 2:11 am

Doxing will teach you how to identify and stalk people following their digital traces, being able to associate a real identity to profiles that you met online. Detracing will help you to understand what kind of traces you're leaving behind you and how to conceal them.

Want to learn about these? Buy now

Ombra - June 19, 2022, 2:25 am

Doxing by itself is not going to harm anyone as it exclusively consists in looking for personal data online. What you will do with found data stays outside of the private investigations field.

Ombra - June 21, 2022, 7:29 am

Everybody can understand and apply this guide as I used a writing style that can be easily followed. Furthermore you will find links and screenshots of the services and activities that you should one.

You are leaving traces when you surf the web and you might be aware of them or not. The important thing is knowing that other people can follow your traces and find out who you are and what you're doing. Cyberdox will help you to hide your traces and follow the ones left by other people, even if they're behind a registered company.

Ombra - June 27, 2022, 1:01 pm

Ombra - July 3, 2022, 12:16 am

Cyberdox is written in English and text cannot be selected, hence your language level should be high enough to understand it without a translator. Don't worry, the writing style is simple and if you can understand this post, you're good to go.

Ombra - July 4, 2022, 6:17 am

Applying doxing techniques might NOT be legal in every Country, even if most of them have no restrictions about gathering other people information. What's certain is that using those information to blackmail/thread somebody will always be illegal.

Ombra - July 9, 2022, 1:19 am

If you have any issue when trying to access the guide kindly let me know about it and I will immediately investigate.

Ombra - July 11, 2022, 1:48 am

All my guides are served inside a web based ebook reader. You can get access to them with any device that has an internet connection.

Ombra - July 12, 2022, 11:38 am

My greatest achievement as writer wouldn't be providing you with doxing/detracing techniques that you follow exactly as they are. In this guide I'm rather trying to provide you with a mindset that can be applied critically, as every user you want to dox represents a different (and unique) case.

Ombra - July 14, 2022, 1:33 am

Perfect Money is a valid payment method but transactions are manually processed. If you'd like to use it, contact me.

Ombra - July 15, 2022, 8:41 am

Ombra - July 28, 2022, 12:57 am

Remember that doxing doesn't guarantee you to succeed in finding personal information about other people, just like knowing a food recipe doesn't guarantee you to win a contest. Your success also depends on the person that you're trying to dox.

Ombra - July 29, 2022, 7:55 am

The guide is focused on doxing but I also wanted to include some chapters about detracing. Detracing represents the other side of doxing because while doxing is about gathering personal information, detracement techniques are about hiding personal information (your own).

Ombra - August 1, 2022, 11:40 am

Bitcoin transactions are processed smoothly. I've finished to update my btcpayserver and website, everything looks working but I'll keep an eye on the systems as usual. If you have issues with your payments please contact me.

Ombra - August 2, 2022, 11:58 am

If you'd like to purchase by paying with ETH or Perfect Money, you can send me a message and I will manually process your transaction.

Ombra - August 7, 2022, 12:14 am

You might or might not be aware about the footprints that you leave while surfing the internet, they'll be behind you in any case. If you care about your privacy or would like to understand how to obtain personal information about other people, this is what doxing is about.

Ombra - August 9, 2022, 1:23 am

The targets of this guide are: providing you with an understanding of the way internet works, giving a critical mindset to realize that all your actions will lead to traces, putting some weapons in your hands that will allow you to discover other people information while keeping your own private.

Ombra - August 17, 2022, 3:30 am

There's an issue with some Litecoin payments not being marked as completed by BTCPayServer. If you experience this issue after your transaction gets confirmed, kindly contact me.

Ombra - August 18, 2022, 9:11 am

Cyberdox will be immediately available as soon as your transaction gets 1 confirmation on your chosen cryptocurrency network. If this shouldn't happen, please post or contact me and I will manually check your payment.

Ombra - August 20, 2022, 2:58 am

I might have to restart my BTCPayServer within today. If you find it offline and are unable to complete your payment please be patient.

Ombra - August 21, 2022, 6:56 am

Doxing doesn't guarantee that you will always be able to find somebody personal information. It depends on the specific person that you're trying to dox. What you will get by purchasing this guide is a mindset that will be oriented on recognizing, following or deleting digital footprints.

Ombra - August 24, 2022, 6:56 am

As per my other products, I had to update all checkout links inside the original post. Old links weren't working anymore as I changed my checkout process.

Once your purchase will be completed, you will receive an email with an access code that must be used on my website. The code will grant you permission to get the guide.

Ombra - August 31, 2022, 10:01 am

Cyberdox is recommended to all users that are either basic learners or intermediate doxing users. It contains all basic instructions about how to perform doxing searches as well as some special techniques that will help you to investigate your target when he's hidden behind a company.

Note that this is an ebook guide, not a doxing tool. You won't have to run this on a computer but rather have a read.

If you have any issue with the reader, while browsing the pages of this or any other guide, please send me a support email. Remember that you can only read the guides that you purchased or you

Bitcoin and Litecoin payments are processed automatically and can be completed using my checkout page. If you'd like to buy with other currencies or Perfect Money, you have to contact me manually

Ombra - September 10, 2022, 5:26 am

This guide is perfect for users that are new to cyber investigation techniques. It will provide you with a complete kick start to discover other people information. You will start learning the most common methods, then move to chapters containing more technical ways to identify your targets.

Ombra - September 11, 2022, 9:54 am

I'm working on some core site updates. You might find the reader offline temporarily.

Ombra - September 13, 2022, 10:58 am

I'm currently recoding the reader, given that before the end of this year I will likely switch my website from one CMS to another. You will not find any difference expect for page layout.

Ombra - September 17, 2022, 8:26 am

Using a doxing guide does not provide any warranty about being able to dox a specific target. Every case is specific because you might find somebody that takes care of digital footprints and somebody that does not. The point of this guide is providing you with techniques and a mindset that you can use during your investigations.

Ombra - September 22, 2022, 11:00 pm

PayPal is not a valid payment method as I only deal with crypto currencies and Perfect Money. If you'd like to pay with PM or with a coin that is not BTC or LTC, please contact me.

Ombra - September 24, 2022, 9:54 am

This doxing guide is not recommended for advanced users. If you already perform doxing investigations I guess you will not find it much useful. On the other side, it is perfect for beginner and little to mid experienced users.

Ombra - September 25, 2022, 11:04 am

Doxing does not have any regional/Country limit. The techniques described in this guide can be applied worldwide, especially because your targets might be in different Countries.

Ombra - September 27, 2022, 3:40 am

The guide has been written in English and it isn't possible to select text to translate it. Despite I tried to use a simple language, if you have serious issues in reading English be aware that you won't be able to use a translator. By chance, if you can understand this post without using a translator, you're good to go.

Ombra - September 28, 2022, 11:09 am

Cyberdox can be purchased with cryptocurrencies and Perfect Money. If you'd like to pay with Perfect Money please contact me. Furthermore, please note that PayPal is not a valid payment method as I don't take it at all.

Ombra - September 29, 2022, 11:23 pm

This guide will teach you all the required doxing steps to successfully setup an investigation. You will always start with a pre-assessment of your target to record/categorize all known information before moving to investigation techniques. Content is completely noob friendly and there are no

requirements needed before purchasing.

Ombra - October 2, 2022, 2:09 pm

The guide comes with detailed chapters and lots of images that will help you to understand where you have to focus in order to gather useful information. The language style that has been used when writing is simple and can be understood without any issue.

Ombra - October 3, 2022, 10:55 pm

Note that your payment must be confirmed at least once by the network (BTC/LTC) before the system ships your order details. If you appear not to receive anything even after 1 confirmation, please check your SPAM folder and eventually contact me.

Ombra - October 5, 2022, 9:52 am

All orders are automatically processed and you don't need to contact me after sending your funds, unless you don't receive your order details once your transaction is confirmed (at least) once.

Ombra - October 8, 2022, 1:58 pm

When talking about dox remember that there's no way to be 100% sure that your investigation will lead to results. It will always depend on the target that you're tracking. Being said this, the main point of Cyberdox is providing you with enough critical thinking to understand how the doxing process works and take advantage of various doxing/detracing techniques.

Ombra - October 9, 2022, 1:58 pm

I'm working on a site migration that will be performed during the upcoming weeks. You're not gonna lose your products or anything as I'm looking for a way to transfer all orders history.

Ombra - October 12, 2022, 1:59 pm

All payments are automatically processed and orders are elaborated as soon as your transaction receives 1 confirmation on your chosen coin network. For instance, LTC payments are almost instant.

Ombra - October 15, 2022, 2:04 pm

After purchasing, you will get an access code to be able to read the guide inside an e-reader. The guide is not delivered as PDF document that you can download.

Ombra - October 17, 2022, 10:47 pm

Ombra - October 18, 2022, 11:25 pm

Cyberdox is made by many detailed chapters that include explanations and screenshots to show you evidence about what's being done and what you have to pay attention to. It's the ideal guide for a beginner or intermediate user that wants to gather some more knowledge.

Ombra - October 20, 2022, 4:16 am

1) God saves HF if after 10 years here I could be called scammer for \$15.

2) If you simply checked my last post you would have read that I was away and unable to check my account and inbox for about 48h:

3) In a post I made 4 days ago I wrote about my mail server being blocked by Microsoft when trying to deliver messages and asking users not to use Microsoft related emails inside my checkout page.

(Oct 18, 2022 11:17 AM)Ombra Wrote: [\[CITE\]](#) When purchasing, please make sure not to use Microsoft related email addresses for order delivery. I'm having some issues with Microsoft servers and therefore all outgoing/incoming Outlook (and similar) emails are being rejected from my own mail server.

Coming to your issue: you used a microsoft email in my checkout page and when system tried to deliver your order details, the email was rejected. I'm sending your details right now to the other address you stated inside the convo you sent me.

Additionally, I will add a message in my checkout page about this Microsoft issue as I would never want something like this to happen again with other users.

Finally, as personal note that I want to leave you: internet forums are made by people that live their life just like you, we're not Amazon or any other big ecommerce with an army of support agents that is active 24/7. I do not recommend to make a post about somebody being unresponsive if 24h are not passed by the time you contact him.

info - October 22, 2022, 4:37 pm

Thank you for sending the serial to unlock the e-book on your website. :-)

My personal review:

Firstly, I am in IT business for several years (5+) now. I have a degree in computer science and software engineering. That is my professional background.

I bought this small e-book, considering that it has 32 pages, because you claimed and advertised in your entry post that you provide "unseen" content, content that has never been public. Is that actually true? ;-)

I was surprised to see that most of the techniques you describe are actually public and known. The knowledge you provide in this book isn't secret. Basically, you describe the use of specific websites, search engines and tools. So, I was kind of disappointed (keep in mind that I am experienced).

In general, as someone who is really interested in "doxing" techniques, it is easy to find the resources if you know what you're looking for. You don't have to pay to FIND the resources. There are some tools and websites that you need to pay, in order to use them more extensively.

As a starting point for someone who is interested in doxing, you could check out this, by the way,

public and free GitHub repository: <https://github.com/jivoi/awesome-osint>
Or this one: <https://github.com/lockfale/OSINT-Framework/blob/master/public/arf.json>

In fact, these OSINT (Open Source Intelligence) GitHub repositories provide more resources and tools than this e-book does. Sorry for stating that.

Would I recommend this book? I would recommend this book to someone who is not very experienced or a beginner, or someone who is just too lazy to do one or two hours of online research.

Would I recommend this book to someone working professionally in IT business, IT security or software engineering? No. Simply because all the resources and tools are public. If you're not lazy, you will be able to find everything you need without the need to buy this book.

Also, I don't see the value of \$15 here. There are more extensive books with more information and pages for about the same price or just a little more expensive (\$25-\$30) on Amazon.

Is this a scam? It is not a scam because you get content delivered. No problem so far. But considering that the author advertises the product with "unseen", "non-public" content and techniques, I would consider THIS to be a scam.

If you change the entry post to a more honest and true description (without typos), I will be happy to change my review in your favor.

Ombra - October 25, 2022, 2:07 pm

As posted several times, this guide is not meant for experienced users. I'd discourage you from purchasing if you're already familiar with doxing/detracing topics.

Cyberdox is rather meant for newbies that would like to get into the field, as it provides a basic to intermediate knowledge level and lots of details about described techniques.

Ombra - October 29, 2022, 5:11 am

I'm going to update my btcpayserver adding support to more cryptocurrencies. This will likely be done with one of the btcpayserver plugins. Soon you'll be able to purchase with your favorite coin, allowing more customers to pay automatically and without having to wait for manual transactions contacting me.

Ombra - October 30, 2022, 9:51 am

As announced yesterday, multiple altcoins are now supported and can be used to complete your purchases for all my products.

Ombra - October 31, 2022, 10:15 am

This guide is not limited to doxing as it includes detracing techniques too. If you're not aware about it, detracing is the counter-measure for doxing as it involves methods to hide (or limit) the traces you leave while using your electronic devices.

Ombra - November 2, 2022, 12:38 am

PayPal is not accepted as payment method, I only deal with crypto currencies plus Perfect Money.

Ombra - November 5, 2022, 11:37 am

I've just updated the template of my delivery emails as I realized there was a broken link inside. Luckily it was a simple not working HREF tag that didn't allow to make the link clickable, but it was still possible to copy/paste it inside your browser.

Everything has been fixed now.

Ombra - November 13, 2022, 7:32 am

The guide cannot be downloaded locally, after purchasing you'll receive access credentials to use an online e-reader that is built inside my website, where you'll have to create an account (you just need an email address).

Ombra - November 19, 2022, 5:02 am

Cyberdox is available on my customers website, checkout is automated so by the time you place your order and have your payment confirmed, you'll get access to the guide without any additional action required.

Ombra - November 23, 2022, 9:57 am

Soon I'll edit the original post, adding a checkout URL that does not include an HF contract. This is because of the new policy about contracts not being mandatory anymore.

Ombra - November 25, 2022, 10:33 am

Support is provided either here (contact me with a private message) or using the official contact page on my website. Don't trust any other communication method.

Ombra - December 11, 2022, 9:41 am

Ombra - December 14, 2022, 11:42 am

You can purchase my products with Perfect Money, but payments have to be manually performed to me. If you're interested in using this method send me a message

Ombra - December 18, 2022, 8:54 am

Please make sure to send enough funds to cover transaction fees. If you pay little fees it will take time for your payment to be confirmed and, consequently, for product to be delivered.

Ombra - December 26, 2022, 11:27 am

Please keep this in mind when purchasing as the examples, the approach and the techniques that are mentioned have been selected ad described for a given audience.

Ombra - December 27, 2022, 11:45 pm

The approaches described in the guide are still relevant and the guide can still be purchased.

Remember that Doxing main value is obtaining a mindset that allows identify and collect sensitive data.

That is what I try to teach in the guide, even if it is linked to a selection of techniques for learning purposes.

A single ebook guide will never be enough to obtain ALL the required knowledge. That's a matter of

practice and experience.

I cannot guarantee that you will succeed in doxing with any kind of information.

Doxing is always a matter of chances and success depends not only on the information you have, but also on your doxing ability and the detracing ability of your target.
