Thread: [Easy Money #BTC - \[EASY 10 MIN COMPLETION!\]](#)

faisaljones - August 16, 2019, 11:04 pm

Ok ok ok... So as you know, within the free money world and when there is free money to be made, there isn't a lot to be made without patience and grinding. With this method you can make around 10\$ an hour if you really go at it and get good survey choices etc.

[hide]

So the first step is to sign up at Cointiply.[Sign Up Here](#)

Afterwards you DON'T want to watch the videos or PTC websites because that doesn't give you a fraction of what will be made with the surveys. (These surveys are legit and you will be able to cash out at 10\$ in bits!)

[size=medium]As you can see in the picture below i've made 18,000 Bits (18\$) within around 2 hours and i took a 30 min break as well. You want to choose the surveys that give the most amount of bits for the least amount of actions done. i.e if there is a 3,000 bits survey that only needs you to sign up over a 4,000 bits survey that needs you to sign up and do an annoying questioner. you know which one to choose cause it's faster.

As you can see in this image when you first join there will be a high paying offer from [b]Theorom for 1.1\$ usd. You should choose to do this one because it pays in 10 min and gives you a good starting spot with good income.[/b]

BONUS:!!

For the BTC gamblers out there, there's also a fun game on here that I don't prefer you play long term because you can lose quite a bit but also it's all luck! There's a fun multiplier game on the website that's addicting and fun but play at your own risk!!.

And once again when you hit 10\$ in bits you will be able to cash out and there is also an option to put up a PTC ad for a user to go to your link for a certain amount of time in exchange for a small amount of bits (5-24 a click)

If you enjoyed my method and would like more content please leave a like!!!

Anyone?... I will be giving out 50,000 coins to the first people that comment with proof!
