Thread: [Help me get a Ip Finder Mid-game CSGO mm, i will pay the one who succesfully helps me](#)

vldoq - August 18, 2019, 5:49 am

As said in the thread.

I want a program that can find a IP MiD-GAME in csgo
im so fucking tired of wallhackers/aimboters and such.

so i want to ddos them off the match when i know someone is hacking, i am currently rank supreme
just ranked down from (global) 8 matches with wallhackers in row.

i will pay the first person in paypal who actually helps me get this. im so fucking tired of hackers that
im gonna become a mini hacker that takes out other hackers xddd

ps, i have no clue whatsoever how anything works.

Peedle - August 18, 2019, 6:00 am

no ??????????????????????????????

ps : if u dwnload cain and abel and attach it to Ur Xbox controller then press Y Y Y RT X B LB RB
LT, the match will forfeit and you don't lose

Better to invest some money into getting your TF up so you don't encounter them.

I had a similar issue with my main account.

So i had it boosted for over 70 wins (vertigo) added 250 cheap games for like 14\$ and made a
guide that i rated/commented with many accounts that i own.

I also added 2000 commendations but i doubt that that has any real impact on the TF.

Anyway, this helped me out of the shitty TF.

No problems since! Keep in mind that there are factors that we don't know about, meaning it
worked for me but maybe not for you.

int - August 18, 2019, 12:01 pm

1. Its 97% impossible to get someone elses IP from the server unless some epic exploit
2. No one would accept paypal for an exploit
3. Just send them a grabify link or some shit

The quick answer: You can't.

Since valve added relay's the only thing you could get are the relay ips. If you ddos the relay's down they will just switch to a new one.

Mutiny - August 19, 2019, 6:59 am

Yes PM me I have a tool that's hacked into the mainframe to grab IPs mid game with ease and comes with LOIC. 1 ?and for the tool.

Menalix - August 19, 2019, 7:15 am

I can make you a vb gui interface to track down the player's ip
