LICENSE to PRINT MONEY

[contract=tid]Own A License to Print Money[/contract]

Here is one of several positives reviews from my previous method (whose main focus was not about making money)...

This reviewer paid \$75 for Snow White yesterday and after trying it out, decided against posting a public review (not because the method was bad, but because the method is so good):

"Buster I thought long and hard about that and I'm mad at you

You could make \$40 for 8 mins work every time.

Yeah, this exploit is absolutely godly. I got me and my fiancé some absolutely incredible \$100+ dollar steak and lobster to celebrate this working.

thanks for feeding me

I talked to my girl about this and she agreed whole heartedly not to review because we don't want to saturate it my guy...

Why would you risk this method for absolute chump change in the long run of the potential value of this exploit.

As in saturate from the testimony I could provide :/

That would increase sales etc etc

It's like the best compliment in a way because youre such a hook up but I just hope you can see from my perspective"

Basically, the above reviewer who purchased my Snow White Method said he felt reluctant to leave a positive review because he thought it was too good to give away at \$75 (I understand his point of view though I don't share it...he's a good guy).

Now what if I told you that I have an industrial scale printing press and also a license to print USD notes,

which means I have the ability to print as many dollars as I have paper. (technically it's not paper...paper doesn't work)

You'd probably think I'm crazy.

And I'm not crazy so I'm not gonna tell you that.

Instead, I have something which is different from that.

It's a lot better than putting your balls in a salad shooter and hoping to make money that way, because who the blazes wants to work for some hot dog trottin' tawdry trollop from 9 a.m. to 5 p.m. every day? Not Buster.

Pros:

2 hours per week cutting and pasting something to places I provide you.

The white hat method (the main method) in this 8 page guide cannot become over-saturated unless I write better ad copy, which is never gonna happen.

The audience size is in the MILLIONS, so even if there's 100 people doing this, there's plenty of room for everyone.

There are three bonus methods included in addition to the main method, but the profit in the bonus methods is not yet thoroughly tested (except for the first bonus method which definitely works well).

It's EASY

Imagine you find someone in a denim jacket who's about to hand over cash to a merchant, and you tell him he can easily get that at 10% to 40% discount...

They don't need to join some program with hidden fees or some membership cost; you'll never solicit them for money, you'll only offer them a discount.

You're selling them nothing! You're not talking to him. You're not listening to him. You're not messaging anyone.

You can do this and give people the finger throughout entire process.

These people already have buyer's intent as they are moments away from making a purchase.

Then you swoop in and say, "Psst... you're paying too much for that." ?

But remember, you could be flipping them off as you say it, and this will still work.

They already know what they are going to buy, so you don't have to sell them anything.

Who says no to that?

Only those with half a brain, and with License to Print Money, you won't hear the No anyway...because nobody will say No to you (I promise) You'll only see your wallet fatten ... \$25 at a time.

You decide how you'll get paid... Paypal, Amazon gift card, and more.

Cons:

This method is guaranteed to work only through the end of September, so you have about one month to get in and then this opportunity is vanished in time forever.

Why are you practically giving this away for peanuts?

Mainly because this is not an evergreen method.

This will last only till the end of September, so the MOST you'll earn from it is roughly \$33,000 (assuming you work the method every day of the month).

The least you'll make is \$25, and if that's not the case then I'll eat my hat.

Moreover, your doing this does not interfere with my profit because this is on a global scale.

Your Investment:

\$15 BTC, Zelle, Cash App, Circle Pay
\$30 Paypal

[contract=tid]Own A License to Print Money[/contract]

P.S. This is whitehat.

I've honestly never seen anything like this. It doesn't look too interesting, but I can see how it will indeed work.

Gonna be trying this out all night long. Only about 10 seconds of work every few minutes or so with

the way I have it setup. I don't see enough traffic in these areas to be able to make the amount OP claims, but I'd love to be proven wrong.

It's only \$15/\$20. And you'll definitely make it back within an hour or so, plus more, if you actually put in the work.

You say i need to talk to people and convince them i have the better deal.

Thank you, you have good questions.

I can see that my OP was muddy.

I mentioned in the OP the reason I'm selling this at this price because it is not evergreen.

However, your word "seasonal" is more accurate. This will work until September 30th.

After that, it'll stop working (but it's likely it'll happen again, I can't say when).

I wrote a couple paragraphs that may sound like you're walking up to someone and offering/selling them something.

That was just a metaphor. You really are not "selling." You don't list any products and you don't contact anyone.

The whole "Psst.. you're paying too much for that" was just to illustrate the attractiveness of the thing, but you never talk to anyone or message anyone,

so for that reason this is not selling (except in a broad sense of the word "selling"...this is closer to marketing or advertising than to selling).

The main method takes 5 minutes to set up, and then from that point, "your job" is to copy and paste.

Not really.

I'm not sure if I'm doing something wrong, but I've been doing exactly as told. I can see how this works, but there has to be more to it than what he says. I've been "copying and pasting" everywhere he said. Switching things up accordingly. But haven't gotten any results.

It does not payout the instant after you read the book or the instant after you do the work.

This is not steady income--it's good income for the effort required.

No, I didn't write that.

Sorry for the confusion, but that was for my other book (I've written only two).

Immediately before the "\$40 after only 8 minutes" you referenced above,

"Here is one of several positives reviews from my previous method" (bold added)

Yes, lol...very good point.

It's technically accurate in that \$1,100 was one day's earnings, that was my best day when I was really working the hell out of the method (combined with a fortuitous "event" which is explained in the book...such welcome events are predictable).

So to be clear, it's not \$1,100 every day for 30 days.

That was the highest I ever got.

I should've been more transparent.

Found a way to make this even better.

If you sell on Ebay, this new idea adds +\$25 to every sale you make.

Now, with License to Print Money, you can list a \$25 item on Ebay and get paid TWICE for it.

Yes, you read that right.

You get paid double.

Sure wish I had a good Ebay account now.

That's correct, Lyceum.

You pay half price when you pay with bitcoin, Zelle, Cash App, Circle Pay.

It's not about the fees Paypal charges, or the risk of chargebacks (though Paypal is uniquely worse in this regard).

The pecadillo of Paypal that irks me is if Paypal pinch my balls in a visegrip.

Folks just don't fancy that chuckwagon.

When a company freezes \$8,000+ of your funds, whether for 180 days or for an indeterminate period (7 years now), that's not something you take kindly to.

No, I'm not guaranteeing this method will stop working in September.

In fact, it was revived and now works again, through December 31st.
But after December 31st I expect it to be revived again.

I now understand that the expiration date is just a fine print thing so that the company doesn't have to bind itself to an indefinite period.

Brainbuster - April 6, 2020, 2:24 pm

In light of the recent pandemic, I've lowered the price of License to Print Money by half.
From \$15 to \$7.

Now more than ever, people need to make some dough online.
The License to Print Money is one sure way to do that.

\$15 Bitcoin, Zelle, Cash App, Circle Pay
The price is now \$7.

Whatever is left of the profits (after buying cookies, pudding, etc.),
100% of the remaining profits will go towards battling the pandemic (building the wall).

All I ask is that you renounce Jesus Christ as your personal savior.
