I would like to test it. May I have vouch copy please ?thanks in advance

senderwood19 - August 20, 2019, 12:22 am

I got the crypter from this guy. It worked excellently well with java and js. My file was FUD after crypting and was able to send in emails without being detected. You can give him a try. I vouch for him

@OP be careful with giving out vouch copies, most people asking for vouch from my experience are just broke dudes and too poor to purchase tools. Most of them will get the vouch and not even come for reviews or buy the soft.

First i would like to thanks you for Vouch copy. I will test it after couple of time and will share my experience here .

Once again thanks buddy for Vouch Copy.

Regards

well , i tested this crypter. The Developer really deserved to be appreciated. GUI is Simple but he manages options very well, good in encryption , I tested it on Defender , Avira and Kaspersky and found FUD during Runtime + Scan Time. Vouch for the guy. keep it up
Best of Luck

Wendigo - August 20, 2019, 4:35 am

Hello,

What's the recommended rat for best runtime result?

BestHackTools - August 20, 2019, 8:09 am

If you want a vouch copy, write to me on skype. On the other hand, if you want to purchase, Click the button above

Danybram - August 22, 2019, 12:19 pm

Hi Buddy !

I'm really interested for your service. Are you able to script an .exe file in order to bypass the Windows Defender (for the static and dynamic analysis)?

Many thanks for your honesty!

BestHackTools - August 23, 2019, 10:29 am

Many thanks for your honesty!

My crypter does not support .exe program. It can only crypt java (.jar) and JavaScript (.js) files.

equity - August 23, 2019, 3:34 pm

I have no use for a Java crypter atm, I'd take a vouch copy and leave a review if you'd like.

(Aug 25, 2019 03:20 PM)emmgold Wrote: [\[CITE\]](#) what RAT is best suitable for your crypter ?
All java and js Rats

UnknownRAT
jRat
WSH Rat
Netwire
vjw0rm RAT

and any other java and js rats

emmgold - August 27, 2019, 5:46 pm

How about DarkComet, wont it work with your crypter ?

Giving vouchers is trusting your product to a reputable member. Of course, don't give things for free to randoms but also don't expect money from it.

I've never seen someone give a vouch copy and never got a review returned, seems ridiculous too.

If your product is good you shouldn't worry about making sales.

BestHackTools - September 5, 2019, 5:16 am
