Thread: [Azorult HTTP Stealer \(Builder + Panel\) Version 3.3](#)

altieels - August 19, 2019, 2:12 pm

Quote:"AZORult is a Trojan stealer that collects various data on infected computers and sends it to the C&C server, including browser history, login credentials, cookies, files from folders as specified by the C&C server (for example, all TXT files from the Desktop folder), cryptowallet files, etc.; the malware can also be used as a loader to download other malware. Kaspersky Lab products detect the stealer as Trojan-PSW.Win32.Azorult. Our statistics show that since the start of 2019, users in Russia and India are the most targeted."

Hey altieels, great info. However the file doesn't work, do you have another download link?

meskat1982 - August 29, 2019, 2:33 am

file deleted from sendspace :(

Links - August 29, 2019, 2:34 am

This looks really good, but when you're back online be sure to update the download link!

Post relevant links please, it'd be greatly appreciated as to prevent members from being infected.
(I'll DL it and check it out when I got time for sure.)
