Thread: [Words/Text vs Images/Screenshots on HF - which is one is better](#)

ideaatounotesutowan - August 19, 2019, 8:49 pm

I'm starting to feel too useless of using HF with words and text as useless asks for help poorly ? ; almost in a hell of a lifetime of mine,
my idea of adding my own user-made uploads of images and screenshots from a "my-own" created imgur or any similar image/screenshot hosting site than that to the HF site threads/posts instead could help things better than words and text even. ?

Poll added/included if needed necessary. ?

I'll decide when to do that. ?

This thread doesnt even make any sense. The only thing that does is the title I guess but its so confusing...

Yeah; i can guess that. : \

Though i might agree with adding/posting images/screenshots on any of my HF threads/posts to create instead of too much always words or text text only if wanted considering that or not as yes or no.

Easy or hard enough to say be better choices and decisions than that i can 50% agree with mostly.

edit (08/20/2019 - today/tonight);

Aw, sh*t.

Imgur got their own MPNV (mobile phone number verification) trash - now what, i can't create an imgur account from here without that.

Bull. ';' -p
