Thread: [Need help to Log into Locked windows 10 pc](#)

**Samwise Gamgee** - August 20, 2019, 9:34 am

solved solved solved solved solved solved solved solved solved solved solved

**SysAdmin** - August 20, 2019, 10:06 am

You'd need to get into the account itself then, not sure of Microsoft's security though, never tried going against it.

**CyberStrike** - August 20, 2019, 10:08 am

Password reset, have another device which you can access said email account. It's actually easy and the best way then you can change all that online jazz.

The Windows 10 Sub Forum in the Tech Section is a wealth of information.

[Microsoft Windows](#)

Basics of what you will do:

[https://answers.microsoft.com/en-us/windows/forum/windows\\_10-security/removing-a-microsoft-account-from-a-windows-10/ff7246e8-aedb-4b84-933f-a15448d8748e](https://answers.microsoft.com/en-us/windows/forum/windows_10-security/removing-a-microsoft-account-from-a-windows-10/ff7246e8-aedb-4b84-933f-a15448d8748e)

But of course you need another account you can access, so activating the Administrator account is in order Boot into safe mode DO NOT enable networking

<https://support.microsoft.com/en-us/help/12376/windows-10-start-your-pc-in-safe-mode>

Enabling Administrator :

<https://windowsreport.com/disabled-administrator-account-on-windows-10-fix/>

You will use the net command extensively this is the help page

<https://support.microsoft.com/en-us/help/556003>

If you have a Windows 10 boot media and boot from that and perform automatic repair it makes it much easier as you might get access denied in safe mode.

Edit: Worst case scenario Linux live media have an external HD and backup the files to the external HD and format **\*\*worst case\*\***

**MavenGradle** - August 20, 2019, 10:13 am

One word: Kon-Boot. Well, it's not a word that is included in the official English dictionary but you know what I mean:

<https://www.piotrbania.com/all/kon-boot/>

Another thing you could do is data recovery for the drive using another machine to hook the drive

into but quite honestly Kon-Boot is usually my go-to solution for this.

**kayla\_90** - *August 20, 2019, 6:50 pm*

Lime Maven Gradel pointed,use kon-boot

Its a viable solution,goid luck
