Thread: [The Amazonia is burning:](#)

tonitones - August 21, 2019, 10:14 am

I don't know if you've heard this but the Amazon Forest has been burning for 2 week already.

"Over 1000KM² of the Amazon Forest has burnt to the ground in the last 16 days. Completely out of control. The rainforest provides more than 20% of the WORLD'S OXYGEN. Zero international coverage. Allegedly; it was started intentionally to 'clear lands for agriculture and drive out indigenous people'."

I haven't heard anything from local news or TV about it from where I live. I have only seen it on social media.

RainbowHentAi - August 21, 2019, 11:44 am

And nobody saying anything about it until its too late...gg

Rsynced - August 21, 2019, 3:52 pm

The Big Agriculture businesses want the land, sadly I am beginning to think this is the elites end game. Maybe they feel threatened by the internet and social media with people coming together for the good of humanity. These past years they have been more aggressive than I have ever seen in my life time. Seems like they want to take it all and are hurrying to do so... Insanity at it's core.

Blogger - August 21, 2019, 4:38 pm

I believe it's on week 3. Sad to see it happening. They don't expect it to survive. All for development. Money truly is the root of all evil.

Notre-Dame cathedral was burning, everybody loses their minds. The Amazon forest is burning, no one gives bats an eye.

Lindros - August 21, 2019, 6:48 pm

Oh my that is a huge amount of forest. Crazy, I guess it clears debris and helps richen the soil for the next generation of trees.

I wonder what caused the fire.

Manks - August 21, 2019, 7:05 pm

The reason why its not being covered is that it was intentional. They've been trying to do this for years; apparently everyone was distrasted enough for them to do this.

They're saying that it was intentional and Brazil's president is allegedly behind it to clear the land for agriculture shit.

Lmao that is insane. What an asshole.

RainbowHentAi - August 22, 2019, 6:04 am

(Aug 21, 2019 06:29 PM)tonitones Wrote: [\[CITE\]](#) Exactly.

Notre-Dame cathedral was burning, everybody loses their minds. The Amazon forest is burning, no one gives bats an eye.

Didn't you know an old church is more important than some lousy trees...

INeedHelpWithMyAccount1 - August 22, 2019, 6:30 am

This is an attack to the humanity as we know it. Fortunately Internet is still a great place to bring important news up.

Tyler Durden. - August 22, 2019, 6:44 am

damn, if this was intentional then its really crazy and couldn't possibly be legal in any way lol

maryous - August 23, 2019, 11:53 am

Quote:Exactly.

Notre-Dame cathedral was burning, everybody loses their minds. The Amazon forest is burning, no one gives bats an eye.

its cuz the Notre-Dame was in front of everyone and everyone recorded what happened but this's a forest. It's true its more important to save nature but sadly no one cares for trees that keep us alive.

RainbowHentAi - August 24, 2019, 6:16 pm

The photos are also outdated but still, fires are up 80% this year from same time last and are still happening so _(?)_/\

Quote:The official figures show more than 75,000 forest fires were recorded in Brazil in the first eight months of the year — the highest number since 2013. That compares with 40,000 in the same period in 2018.

Forest fires are common in the Amazon during the dry season, which runs from July to October. They can be caused by naturally occurring events, such as by lightning strikes, but also by farmers

and loggers clearing land for crops or grazing ...

Activists say the anti-environment rhetoric of Brazilian President Jair Bolsonaro has encouraged such tree-clearing activities.

In response, Mr Bolsonaro, a long-time climate change sceptic, accused non-governmental organisations of starting the fires themselves to damage his government's image ...

... The Amazon Environmental Research Institute (Ipam) has stated the recent increase in the number of fires in the Amazon is directly related to deliberate deforestation.

While the exact scale of deforestation in the rainforest will only be certain when 2019 figures are published at the end of the year, preliminary data suggests a significant rise.

The National Institute for Space Research (Inpe) tracks suspected deforestation in real-time using satellite data, sending out alerts to flag areas that may have been cleared...

Regulus - August 24, 2019, 6:25 pm

Yeah this is really sad to be honest, seeing it on my Facebook feed all the time and on the news :/

xSh4dow - August 24, 2019, 10:34 pm

I Hate when the greedy man does this for Bussiness, If it was intentional they must have been low IQ humans, we need all the trees we can possibly save, it provides oxygen and absorbs heat, those ice caps are not going to stay cool for a long time, Last time I check, they are trying to bring back the mammoth ancestors with a cloning device using a baby mammoth found by the Russians while using the closes distant relative of the mammoth in the elephant family as the surrogate vessel, don't these people know how long it takes for a tree to even grow to an adult size, on top of that it may not even be possible to regrow plant life on the burnt environment, the whole ecosystem will be fucked, in the jungle, excuse my language.

SIM-3684208 - September 2, 2019, 1:56 am

The planet is fine, the people are fucked -George Carlin said this exactly how it is

n31ght0 - September 3, 2019, 6:53 am

i'm pretty sure the burn cause not natural and by design probably corporation do it for the open land cheap way to clear path

Offgrid - September 4, 2019, 5:06 pm

Silly humans, put money, profit before the planet. The only home we have in the cosmos.

og mike - September 4, 2019, 11:46 pm

Money will cause the whole world to burn.

Pluxo - September 5, 2019, 10:22 am

I've been hearing about this a lot, and its such a shame that nobody cares, or cares enough to cover a story about it. If only we could all come together to actually do something about it, but all anybody gives a shit about nowadays is politics, the wall, north korea, etc. Time to focus on actually saving the planet.

Rsynced - September 6, 2019, 2:02 pm

They put a 60 day ban on burning. People do care. Supposedly it was worse in the 90's...

Forbes:

<https://www.forbes.com/sites/rachelsandler/2019/08/29/brazil-bans-legal-burning-for-60-days-to-fight-amazon-fires/#7a51c48420a2>

ak_toys - September 6, 2019, 7:10 pm

Scary with the incident

? ?

ET_Advice - September 7, 2019, 3:06 am

Fun fact. Every year around that time there are forest fires, including the Amazonia's burning.

Check the news.
