(Sep 11, 2019 04:23 PM)Juicy Wrote: [\[CITE\]](#) Purchased this a week ago for one account, and ill be upgrading to the 3 account option as soon as I have a little more money.

I would recommend this to literally anyone, it took about 5 minutes to set up and for the last week I have just let it run.

Here were my insight stats beforehand:

Buy this instead of an ebook.

1. Buy this
2. Grow an account with it.
3. Sell the account.
4. ???
5. Profit.

The account is set to private and I haven't used it for over a year but it still has a lot of posts and a good profile pic.

You got my huge vouch, this works really really well. ?

So I've been using the tool for few hours now and it has surprised me with all the functionalities it has to offer.

Mostly, all the tools are available handy on the left pane of the panel.

I'm definitely going to extend my service.

That's odd. Are you logging in via mobile or your PC? It may be that you don't have a mobile linked to your Instagram.

If the problem still persists. PM me a screenshot and I'll upgrade your account free of charge and fix the problem.

Also, if anyone leaves a review, you'll receive 1 month free membership.

Sent you a PM.

For anyone else concerned. You can literally grow any niche you want. Just find a few large accounts with a similar following and you can target their fanbase. GramHQ will go through their active followers and watch their stories. When people look at who's viewing their stories, they'll check out your page. If your page is something they're interested in (which it should, since they followed the accounts your targeting), they'll follow and like your posts.

It was only a matter of time before that account disappeared.

(Aug 26, 2019 09:38 PM)Ashley1988 Wrote: [\[CITE\]](#) I dont understand why mass story viewing will help me to get new followers. Can you explain this?

When you view someone's story, they can see that you've viewed it.

When a random person views your story, most people will check their profile to see who they are.

If you're trying to grow a meme page, and target big meme pages followers, chances are they'll follow you since you've viewed their story and engaged in their content.

How many followers you gain depends on the quality of your profile and the niche you're targeting. However, I know accounts gaining 500+ followers daily solely from mass story viewing.

It's the #1 method to grow on Insta.

There are definitely limits you need to be wary of when using masslooking. We have specified which speeds you should use to keep your account safe.

Obviously you're account must be somewhat active and aged to use the max speed safely. New accounts however must start with a low speed just like any other automation process.

Your GramHQ account, or your Instagram was logged out?

We recommend you use your own Private proxy if this continues to occur. Or, if you have a premium package with us. You can request one from us.

The Invoker - August 30, 2019, 3:09 am

My GramHQ account was logged out telling me that my instagram account got banned API or whatever, I tried again later after 2 hours, I am now logged in.

My account is +4 years old, post old, and have 100k+ followers.

Settings set to 250,000 story views / day.

Is this somehow risky? and why was my gramhq account logged out?

There's no reason you should be logged out of GramHQ. Unless you cleared your browser cookies. Your account is perfectly safe at that speed. You could increase it as well.

Our site doesn't give any sort of messages like that, it's automated to stop once your account reaches the api limits to ensure your accounts safety. I'm guessing that's what you're referring to.

EDIT: This may be a proxy issue. Please contact me for a new proxy.

I was wondering why I had 100+ story views for a while, all people with a lot of followers or blue checks. Definitely this.

Oh also, I've been using this for 1 day (over 200k stories watched) and gained 2 followers. It's my personal account though so I don't know why people would follow me.

Nothing unusual and the account is 3 years old, was deactivated since about 6 months until 2 days ago.

I'm slowly raising it to 250k/day.

Edit; actually my trial just ended. But I might pay for the service later on.

I have to say after receiving the trial and getting a free month to make up from my previous experience the story viewer works like a charm and I would not hesitate to purchase this at all. Very good to grow an account.

Buy this instead of an ebook.

1. Buy this
2. Grow an account with it.
3. Sell the account.
4. ???
5. Profit.

I wouldn't recommend engaging with other content while mass looking as you will certainly hit the api limit very quickly.

We do not plan on re-enabling our auto like/follow features as they will more than likely result in account bans with Instagram's recent API updates.

Are you referring to looking at stories or engaging with posts on your feed? Such as liking and commenting.

You may be able to view stories, but don't like, comment or follow anyone else as it interferes with the Instagram api limits. Meaning you won't be able to view a lot of stories daily.

Why does it view 200 stories per person? Which is just 125 people who MIGHT look at their stories (doubtfully their old ones) and folow back. Or does it place me in their "you might want to follow _____" thing or something?

It doesn't.

It views 200 stories from your targets followers, each time. And this differs depending on the speed you choose.

When you say, "might look at their stories". It's already proven this is the best method to grow on Instagram.

People are interested in who is looking at their stories.

My apologies, it was just showing a different display picture for every 200 followers and that confused me. I'm on over 5,600 story views right now though and got 15-20 followers and the followers are the right demographic and everything. Plus I haven't been banned! I suppose not many people check every person that watches their story and those that do don't always look at your profile and those that look at your profile might not even follow you so low numbers make sense, I just wasn't expecting numbers this low. Any suggestions?

This could be a really great tool I think. Plus I haven't touched the other settings, the planner looks nice and the repost tool and delete tool is kinda genius for marketers. I haven't tried it but it doesn't look like you get to preview what the next image will be which would be incredibly helpful. If it does do that then great!

That's an issue regarding Instagram, as we don't send the code.

Instagram can be slow when sending codes, and i've had the same issue you're experiencing many times.

You're most likely logging in too quickly and requesting too many codes. Try again in a while.

I'd recommend waiting a day or two until we've fixed the issue. We're adding extra time to everyone's packages for the time lost.

All Masslooking tasks still run in the background however.

Kash Studios - September 25, 2019, 8:18 am

I went out on a whim and purchased this solely for the mass viewing for stories, as someone who grows Instagram accounts as a full time job, I thought it would help me highly in that field.

Other than the website being down a few times, OP is very understanding and extends memberships with in reason. I purchased the basic \$9.99 package to test on my personal account and I am very happy with the results!

I've been running the Mass Looker for a total of 12 hours, and in them 12 hours alone I have gained 40 followers and close to 80 likes stretched over my 4 posts. This may not seem like a lot but there's two key points you must remember.

- 1) The followers and likes are 100% organic
- 2) I've literally done nothing on my end but a 5 minute setup

Anyone that knows Instagram well knows that organic followers/likes are quite costly, so to have this tool not only increase my follower/like count but also increase my profile visits, reach and total engagement. You cannot go wrong with this purchase, trust me.

I wish for a long and healthy success from GramHQ, it is by far the best tool I have used in my months of searching for an automated organic traffic solution for Instagram.

You may need to authenticate your proxy with our IP (51.68.212.100). Additionally, I can provide a proxy if necessary.

Have you used any previous software like jarvee on this account? Try enabling 2FA and then disabling it on your account. I've heard this is a workaround for when your account is flagged for spam. Otherwise, the proxy you're using is blocked by Instagram.

(Oct 6, 2019 03:12 AM)CreativeGuesser Wrote: [\[CITE\]](#) How many followers can I get with this method? Sounds interesting.

How many followers you get depends on the niche your account is, and the accounts you target.

With the increased speed we've recently implemented, you could most definitely see 500-1000 followers daily with the correct setup.

Update:

account got extended, and from what I've heard services will be fixed and additional ones coming very soon.

Same, paid and since then it's not working, I am a really lucky guy (not) , no response from creator

This is the most recent response from my message I sent on Thursday.

Hope he's well and the service is back and working soon, homie has been great with services in the past.

If you want packages extended since down time I'd try PMing him.

not work for me too, we need the update and the days back

bossgamer - November 3, 2019, 8:49 am

still no news,still not working, I am pissed because I paid for nothing! Do anyone know legit alternatives?

I just bought it but the mass story watch it limited to 450k and not 800k seen stories per day as you advertised.
