The search feature really isn't too hard to use.

If you need to remove iCloud lock if you forget the password, you can use an iCloud activation lock removal tool to remove the iCloud activation lock in one click. I have ever use a iPhone unlocking tool, it named UkeySoft Unlocker, which is a iPhone passcode unlock tool and Apple ID unlock tool, it not only can remove iPhone/iPad screen passcode within minutes, but also can remove iCloud activation lock on iPhone 11/XS/XR/X/9/8/7/6S/6/5S/5 and iPad & iPod touch.

I personally have never found anyone or any iCloud lock tool that is able to crack the iCloud lock, I think that majority of these services that are been offered for a payment are straight up a scam. If you end up cracking the iCloud lock pls pass on the required information to be able to successfully bypass the lock
