Thread: [Profitable Bustabit/dice Scripts that never fail.](#)

skadyd - August 23, 2019, 2:04 pm

Hello guys!

I made 3 new Profitable scripts. I simulated all the scripts for 3,172,500 games. 2 of them NEVER failed, 1 failed(but still profitable).

I will share the file that you can check all the hashes with the bustabit's tool
jsfiddle.net/Dexon95/2fmuxLza/embedded/result/.

Between 2 hashes there are 13500 games.

prntscr.com/ou8xi1

prntscr.com/ou8xtz

Script 1 needs 1.954 BTC base balance and has 0.257382 BTC daily profit.

Script 2 needs 0.391 BTC base balance and has 0.082262 BTC daily profit.

Script 3 needs 0.130 BTC base balance (daily profit isn't stable).<--- (i suggest 0.26 base balance to be safe).

That's how i calculated the profit of every 13500 games(from one hash to the next one):

The simulator tool. ~~~> mtihc.github.io/bustabit-script-simulator/

SCRIPT 1 + SCRIPT 2:

% TO FAIL IN 3172500 GAMES:

0,001913652

EXCEL FILE with all the hashes and profits.

PROOF:

I can share screen and simulate any hash(13500 games) that you want from all the 235 hashes, or any hash that you think that scripts fail.

(Even in the biggest streaks of bustabit, scripts 1 and 2 didn't fail)

PRICES:

SCRIPT 1: 0.08 BTC

SCRIPT 2: 0.06 BTC

SCRIPT 3: 0.02 BTC

i dont think bustabit and never fail should be in the same sentence lol

skadyd - August 24, 2019, 6:26 am

Actually you can add me on discord, give me any hash and any amount of games and i will sharescreen and show you live that my scripts won't fail. Script 1 and script 2 didn't fail from day 1 of bustabit.

****Don't forget that i give 1 day free trial, to see with your own eyes that my scripts work perfect.****

SREE - August 24, 2019, 6:36 am

If the scripts are working fine , why you are still selling this for little profit? you can run the script on multiple accounts and make profit. :P

skadyd - August 24, 2019, 6:38 am

I don't have the minimum 0.391 btc that my script number 2 requires. So i'm trying to sell them to get that 0.391 btc. Prices are fine i think.

evelution - August 24, 2019, 8:19 am

Probably the most detailed bustabit script thread I've ever seen..

Question. How can you give a 1 day trial? How can you make us pay once we have the script?

I was thinking a lot about this problem, so I decided a good fair-play for both sides. If I give the script before getting paid, everyone can resell it or just say bye without paying me. So a good solution is: the customer makes an account with HIS EMAIL, HIS 2FA protection authenticator. We do a call, I do share screen, I join in that account, I run the script from my computer for 24hours (with 24hours share screen, no problem about that) and then after 24h, customer pay me and I give the script. I think it's pretty fair for both sides. If someone just scams me he will only take the 24h profit and nothing else (actually he would be too stupid, cause he could win way more).

Okay, it's not working 100% but the chances to fail are these. (I can show you how I calculated them)

You didn't understand probably what I said.

I sell 3 scripts:

Script No.1 requires 1.9 BTC to run and the daily profit is around to 0.22~0.25 BTC(2200-2500 \$)
Script No.2 requires 0.39 BTC to run and the daily profit is around to 0.082~0.085 BTC (820-850 \$)
Script No.3 requires 0.13 BTC to run and the daily profit isn't stable<~ a bit risky script(but it can win 0.5 BTC in a day)

I sell all that scripts for:

Script No1: 0.08 BTC

Script No2: 0.06 BTC

Script No3: 0.02 BTC

I also said that if someone is not sure they work, I can give 1 free-trial day to use them.

Hi There,

As a previous gambler on several sites and different games like dicing, higher lower etc, i can tell you this.

The bigger your starting balance the longer your bets will last. This means your chances of winning are higher while at the same time the money you are risking is way higher.

All gambling sites have hard coded scripts that are triggered when a Script/Trick gambler is detected and eventually will drain your entire balance no matter if you have 1k or 100k.

So can you make 5k doing this? The awnser is yes, but as any regular gambler you will need to be very carefull on when to stop, and never chase high winnings.

My opinion: Is it worth to buy @OP's Script, the awnser in my opinion is no for the following reasons:

1.- You are asking users to deal over Discord, always make sure to use the new Hackforums conversations, PMs and only deal with Hackforums Contracts.

2.- Your prices are way too high, you are saying that you are selling your script because you don't have enough initial balance to run Script n°2. So my question is how do you actually know if you haven't even tested it?

3.- A vouch copy is giving your script to a trusted user so this user can try the full product out for free and in return this member will post an honest review about your product.

4.- This is your first thread and the only posts you have is from this same thread. You might want to become more known as dealing with the prices you deal with and the account you have now its likely people will think you will scam as you have an account you wouldn't mind if it would be

banned.

5.- You mention the following "Actually, I've tested it in 3172500 games of bustabit" if this would be true you should have so much profit that you probably wouldn't be selling this

Kind Regards

JaG ?

1) It's okay for me if i make a deal with the customers here or on discord/skype, I have no problem about that.

2) Read carefully. I said I simulated in 3.172.500 real hashes of bustabit, so i said that it works in that amount of games (actually it works in 6.000.000 games of bustabit as my script can handle a script way bigger than the biggest streak (under one multiplier) that bustabit made in 6.000.000 games. And as the profit is 850 dollars per day, I think that 600 dollars price, isn't that much.

3) As I said i can give free one day trial for everyone just to see how it wroks.

4) I just made those scripts and i had to advertise them somewhere, so i found some forums for that.

5) Read 2)

McDolands - August 27, 2019, 3:15 pm

As I said I will take a vouch copy if you're willing to give one out to verify the authenticity of your product, and I can say with confidence my bankroll is high enough to support this though I don't

make a guarantee I will invest \$3000 blindly into your script.

For you and every guy that wants to verify my product: I can share screen and use the simulator tool and the bustabit's hashes tool to see clearly that it works 100% fine. PLUS I give that 1 day free trial (i will explain in PM how we gonna do that, so both of us can be safe). If you can take a vouch copy by that free-day trial, as you are the first customer, if you invest that amount for my script, we will share the results and i will give you free one of my scripts.

For some reason, that guy JaGLY modified my popularity as -3. I would really like to learn why. I am not a scammer or sth, if the problem is that you want to contact via HF messages, I have no problem. I said add me on discord just for the sharescreen.

As I don't have the minimum required amount of 0.39 BTC to run it in one account I cannot give a vouch. I can give you a screenshot/or I can share screen and simulate any hash and any amount of games that you want prntscr.com/oyvt28 . If someone wants to help with the vouch, he can offer his 0.39btc and do the 24h test. I will give free the scripts to that guy.

If you want, check out the bustabit simulator tool mtihc.github.io/bustabit-script-simulator to understand how it works.

Also, Escrow accepted. He can check if the script runs too, I have no problem about that. I don't know if that guy feels safer with that. Cause he modified my popularity to -3 without proofs, just cause I am a new member.

Number 3. I did a run with base bankroll 0.07. I suggest 0.13btc or more for your safety.

skadyd - September 2, 2019, 1:08 pm

As I haven't that 0.39 btc to run my script number 2 as vouch. I converted my script to ethereum and tested it in primedice.

primedice.com/?modal=user&name=xenofontas 0.1 Eth in 1 day

And

primedice.com/?modal=user&name=xenofontas1 (I am still testing it, I will stop when I get 0.1 Eth profit)

As primedice plays lower amount of games per day than the bustadice, i bet higher(so the profit is that 0.1 as I promised), so risk is higher too.

Imagine tha script number 2 didn't fail with higher bet and risk. So with the lower risk that I suggest, possibilities to fail are way way lower.

@JaGLY After all that, I'm waiting for you to take back your negative vote for me, as your vote was based on your misunderstanding. I didn't say that I tested in an account on bustabit, I said that I simulated in all that hashes that I've posted in my excel in bustabit's simulator. You didnt read carefully my thread. For those who wanted to be sure that those scripts work fine:

I did a test to 4 accounts with 0.391 Eth base bankroll (as I don't have 0.391 btc to do the test)
Goal is to make 0.1 Eth(so if u run with 0.391 btc profit would be 0.1) on each account in 1 day as I promised to you.

1st acc: primedice.com/?modal=user&name=xenofontas

2nd acc: primedice.com/?modal=user&name=xenofontas1

3rd acc: primedice.com/?modal=user&name=xenofontas2

My thoughts exactly... I remember a member on here a couple years ago who had it made with a great script. He promised members cash, and for a long time he delivered...

Then he was on stream one day and lost everything. And people loaned him MORE money who were watching the stream (a lot of people that were already invested), and he proceeded to lose that too.

Everyone was so pissed or very amused. lol

skadyd - September 9, 2019, 11:04 pm

Well, it's gambling. I gave % of losing. I said 0.0019 games fail in the 3.172.500 games. It's always a chance of losing. Doesn't change the situation, you may win 2 BTC and then stop it. It's up to you. I think that everyone can decide "greedy or take that money and stop"? Also they can split up the BTC to many accounts and run the script. If I was 10000% sure that it will not fail I wouldnt sell it. It's an investment for buyers.

gex231 - September 17, 2019, 1:07 pm

Bought script, skadyd couldn't find the chrome script. Gave me a dicebot script instead.
Dicebot script didn't work.

Gave me basic martingale settings to put in to dicebot. I questioned what the script was about then if this was the "method", and Skadyd blocked me on discord where he provided me with the script.
LOL

Don't bother dealing with this guy unless you feel like losing money. (Both from gambling and from getting scammed)
