Thread: [Looking for someone to write a simple script for me](#)

Vajra - August 26, 2019, 11:56 am

Hi guys,

I'm looking for someone to write a simple script for me.

The script needs to fetch usernames from a website and put them in a txt file.

The website lists their users through an id number (i.e [https://*%^\[&*%^\[&/user/2348598](https://*%^[&*%^[&/user/2348598)) and the username is in the html title tag of each of these pages.

for example

```
<html>
```

```
<head>
```

```
<title>blabla - Some Gallery</title>
```

So the script has to run in a descending manner and write the usernames one by one in a text file.

I pay with crypto

```
[contract=tid]Start Contract[/contract]
```

Hey, I can help you complete this. Send me a PM with your budget and I'd be happy to help!

hdev0 - August 27, 2019, 2:06 pm

Hi there! I can help you that. As a freelance developer, i usually do web automation scripts. If you're still looking for someone, send me a PM so we can discuss this further. Cheers man!

Prawnster - August 27, 2019, 2:10 pm

Hey bud, if none of these guys above have managed it then lmk and I'll be able to do this no problem :)

Neos07 - August 27, 2019, 8:29 pm

If you still need this done, send me a private message.
