Thread: [Comparisons of Botnet with Layer 7 and Layer 4 Scale-up Attacks](#)

canyi - August 28, 2019, 6:59 am

Hello, handsome bosses

Comparisons of Botnet with Layer 7 and Layer 4 Scale-up Attacks

Which is more powerful?

Used to attack websites and high-security servers

From what channel can they be purchased? From what channel can they be purchased?

Qwickload - August 28, 2019, 7:06 am

your not allowed to ask where they can be purchased

But I think layer 7 is stronger by comparison

Dark Spider - August 28, 2019, 8:10 am

You know what a layer is?

The layer 7 is the appliaction layer it's very easy to attack the app layer but also easy to use a software firewall.

layer 7 has diffrent attack methods ned if it's no trash the shoul hit very hard on the layer 4 we talk about the Transport Layer means if you use 100%of traffic you reach Limit an success crashed layer4 and this means 5-6-7 is also crashed up

Sorry for my bad English hope it help

Okay, can we talk in private? Give me your telegram or skype

Qwickload - August 29, 2019, 3:33 am

no sorry I'm not helping you find ddos stuff

canyi - August 29, 2019, 7:23 am

I have four qbots, but they all disappeared in a flash. Can someone help me to answer them? Thank you, handsome bosses.

Like hosted or you HAD 4 bots?

or..? It's not clear what your asking
