Thread: [Like for someone to teach me the basics](#)

DaddySenpai - August 28, 2019, 6:42 pm

Like DDoSing mining python and other basics

I primarily would like someone to teach me the basics of Botnets and the such

add me on skype hentaisgross@gmail.com

I saw this and laughed.

Please read this:

www.catb.org/~esr/faqs/hacker-howto.html

and this

[The Essential Skills to Becoming a Master Hacker](#) Null Byte :: WonderHowTo

Another thing. Someone can't teach you to hack. You have to teach yourself. We can give tips here and there but that's about it.

Sorry but you clearly don't get the point of hacking forums and how they are meant to help you learn.

First, learn how things work. You need to learn as much computer networking, operating systems, and programming as possible. Once you know how things work, only then you will be able to see how they can break.

OBAMASELF - August 29, 2019, 6:55 am

The best start would be YouTube. There are lots of Tutorials out there that talk about the DDOS and other basics. Let me know if you want some basic channel names to start with. Enjoy hacking :)
