Bump since we are the best ;)

[warn]

Due to HF only allowing up to 15 images, I couldn't embed all them.
Instalation & UI:

Simple and easy. I download the software, ran the exe file, put my license key and activated it.
Spoiler [\(Click to View\)](#)

Once my license got activated, I get access to the AIO's menu Spoiler [\(Click to View\)](#)

Functions:

Account Gen: Added my 2Captcha ID and Proxies and started. It worked, but it took a while so be patient. Spoiler [\(Click to View\)](#)

Follow Increaser: This tab only works with the accounts created from the bot itself and not created/cracked elsewhere. So i loaded my list of accounts created & target channel and hit start. For some reason, I didn't get notifications for the new followers in the dashboard, but i got email notifications for it. Spoiler [\(Click to View\)](#)

Stream view Increaser: Same process, loaded proxy and target and hit Start. My proxies weren't that good for strem views so i only end up with low amount Spoiler [\(Click to View\)](#)

Channel view Increaser: Same process, loaded proxy and target and hit Start. Spoiler [\(Click to View\)](#)

Chat bot: Sadly due to not having a chat lists, i couldn't effectevly test the bot.

Oauth Grabber: For this tab, i decided to use some of the account i acreated earlier without Oauth Spoiler [\(Click to View\)](#)

Video/Clip view Increaser: For this, I tested it on a Clip video. Loaded my proxies and target clip and hit Start. Spoiler [\(Click to View\)](#) Before: After:

Sub-Follow-Checker: For this, I used a part of hits list i already have and mixed it with bit of invalid accounts. Spoiler [\(Click to View\)](#)

Personal Thoughts:

The AIO has a nice UI, simple to use, and include most if not all features that you need.

Good proxies play a big role in how fast will the bot work, and I suggest using rotating proxies with anything twitch related for better results.

Something I would've loved to have is the ability to use multiple tabs at the same time rather than having to open multiple windows of the program itself.

Price wise, it's not cheap nor too expensive. It's a monthly/weekly subscription, but it seems like the seller offers a limited lifetime key which isn't cheap but if you will be doing a lot of Twitch related stuff for a long time, then it's worth buying lifetime key.

Also, from what I've seen you also get access to all future updates without any extra fees.

StrongMinds - September 5, 2019, 6:56 am

I purchased a week long version of steamertool.com as was very impressed. As my week comes to a close I have been able to tinker with it to fit my streaming settings and am nothing but impressed. There is a barrier of entry of course with fees from 2captcha and proxy list purchases if you do not currently have any. However the discord and the notes provided on how to function the bot are extremely helpful in the setup and the use. I would recommend this to anyone looking for a boost in followers, channel views, subs, or live viewers. If anyone has any questions prior to purchase shoot me a PM or ask on here and I'd love to help. Great product and great people!

Didn't get any contract.

Lifetime is only BTC/ETH for a reason.

Too many chargeback kids that are willing to scam, if you want to buy lifetime simply exchange your pp to btc and buy via the website ;)

1 license = 1 RDP. You can change RDP's if u want by contacting me.

Yes.

You can read all features on my website (There is DOCX that explains everything)

We are still the best in the market ;)

Handsome-Jack - September 29, 2019, 7:23 am

Been working with this viewbot for almost the whole month now, and I have to say i'm very disappointed.

It could just be my channel, buuuut the most I was able to get here was 6 viewers bot wise with either public or private proxies.

I'll change this if support helps me solve this issue.
