Thread: [Rohac's Exchange Service || Smaller Amounts - Bitcoin & Verified Paypal ||](#)

Techie - September 1, 2019, 5:12 am

Welcome to my Exchanging thread.

The goal here is to create a place where you can easily exchange your small amounts of Bitcoin/Paypal, often coming from simple transactions you did online or leftovers from some other exchanges you did, without having the rates changed.

Rates:

Your Paypal -> My Bitcoin = 12%

Your Bitcoin -> My Paypal = 2%

I'm also setting a max value of \$50 when sending Paypal to me.

If you're interested in dealing with me, please fill out the form below and post it on this thread, send me a pm, or contact me on Discord!

Do you have Paypal or Bitcoin?:

How much do you have?:

Do you accept the ToS?:

T.o.S.

I have the right to refuse to deal with you.

I only deal with Verified Paypals.

I do not accept Paypal funds from Fake, Stealth or E-Whoring Accounts.

I do not accept Paypal funds from newly registered members.

In case of Paypal funds getting chargebacked at your end, you must refund the full amount.

The Bitcoin value i'll be sending, will always be based on the Paypal amount i receive.

Bitcoin fees will always be covered by the person sending them.

I will not go first under any circumstances. If you wish to use a Middleman, it's at your expenses.

NEVER, under any circumstances, initiate a contract without talking to me.
