!Soul - September 1, 2019, 3:08 pm

INTERESTED IN SEEING THE STORES I'VE DEVELOPED? CONTACT ME VIA SKYPE OR PM FOR MORE INFO. *PROOF OF FUNDS REQUIRED SINCE THESE ARE A-CLASS STORES I'M SHOWING.*

Hey hackforums community, I am going to be offering a very special shopify development service to a select few members. As many of you know, I've achieved a lot of success with my main Shopify store over the past year. I've had all of summer to scale my store and it's now raking in a ton of daily revenue. I was really interested in pursuing another store/niche but simply don't have the time anymore as growing and scaling the business takes TIME and EFFORT. I recently ended up reselling the alternate store I completed and realized something, I could still have an alternate stream of income by helping members setup beautiful stores while still having time for my studies. By this I mean, I will provide members with a fully setup shopify store ready to launch based around their preferences & niche. Several professional features will be included in the back-end such as branding, up-sells, scarcity and overall highly effective marketing tactics. On the front-end I will provide a beautiful website design along with designed graphics and an optional photoshoot for your product. I am NOT interested in spoon feeding members to success, what I am doing here is providing you with everything you need to succeed, it's YOUR job to put in the work and effort to scale your store!

The cost of this service will be relatively high simply because I am designing your store to the best of my ability and that takes a lot of creative effort. I will be providing you with the upmost high-quality store including a beautiful premium theme and landing page. The store will be fully ready for launch and it will be your job from there to scale the business. Fortunately, I will be providing you with the best course of action to take for your marketing campaigns to maximize revenue and profit. I can basically guarantee that if you follow my marketing plan you will see the results over time. Remember, this is a real business and it takes investment, time and effort to see real success. My job is simply to maximize your earnings potential in the e-commerce industry.

If you're 100% serious about diving into Shopify than this is the best way to effectively get started without wasting time. I spent years trying to learn how to create and develop a successful shopify store and I have finally reached a point of success. Use me as your key to success by capitalizing on this rare opportunity. I really hope to see creative members who realize the potential of what I am offering here.

It seems like you're having some difficulty reading the thread, I clearly state the store is "ready for launch". You use fancy words but fail to realize a business is what it's assets are worth, these can be intangibles such as domain, theme purchase etc. I'd suggest doing some more research, perhaps taking a basic accounting course would help.

When people typically sell dropshipping/shopify stores, the idea is that the owner either doesn't want to put up with funding ads or they legitimately don't have the time/skills to continue fulfilling orders.

The idea behind this is that the guy has already done all the work setting up the shop and finding a good product to sell, so all you have to do is run it yourself and invest in your own ads.

Don't think it's a bad deal if the niche is really that legit and if the buyer knows how to run ads. Doesn't matter how well the store is set up and how good the niche is, if you don't know how to market, you'll fail. But as op said, it's ready to launch. If it was making profit already he wouldn't be selling it for \$450. Stores earning can get 10-15x their monthly rev.. sometimes more. GLWS!

It's really good to see that there are members who understand what I'm offering here. As mentioned I simply don't have time to run another store due to my circumstances now so I need to let go of this store. You will receive all the marketing info you need to get profiting with the store as well. It will be your responsibility to execute and scale.

The store price is really fair considering the potential this niche involves. Also the way I designed this store utilizes the niche in the best way possible, you really have to see it to believe it.

^ This is definitely correct, nobody will sell a store that's already earning (because of time invested and earnings potential) unless you're ready to dish out a TON of money. The one thing though is that I provide a fool-proof marketing blueprint for the buyer so you will know how to effectively market the niche to the proper audience in a profitable way. It's the buyers job to put the effort into growing and scaling the business into something huge. I am happy to help, but I'm NOT here to spoon feed you to success.

Thank you everyone, really glad how well this has turned out. Store has been passed on so there is no reason to have this thread opened anymore.

After MANY requests from you amazing members I have come to a new decision. I will be resuming my store development service for a short period of time while my workload is low. Please review the revised thread for more information. Look forward to taking a few new clients.

I am glad to provide proof of work to any member who can show me proof of funds. The stores I will be showing you are of the highest quality and I don't want my creative work getting copied.
