Thread: [Forex Technical Analysis](#)

JOSVEN - September 2, 2019, 11:45 am

Pretty much I want to help new and existing traders. I currently have a telegram group with over 500 members.

I have been trading for five years now I want to give back to the hack forums community.

So I want to create a new Telegram group for like-minded Forex traders to share ideas and technical analysis.

If you want to join the group then just drop a post below or PM me and we can get this set up and remember it's 100% free.

P.S what do we think on EUR/USD testing the low of 1.0740?

THE NORTH FACE - September 2, 2019, 2:27 pm

I'd be interested in joining. There is some Support around 1.086 but it could keep falling. I am already out of my short since it was a holiday weekend and I wasn't about to have it gap up and take my sl out haha

Combatsucks0 - September 30, 2019, 2:25 pm

Looking to start, no prior experience or knowledge but wanting to learn. Definitely would like some

help

hackattack - October 2, 2019, 6:51 am

I think that fundamentally is the EUR not something to invest in, but think it could bounce up a little around 1.0740, and later on, start trending down again.

We can't forget that the German economy has started to slow down and it's one of the largest economies in EU. And i don't see that it's priced in on the chart.

?Dødgygeez - October 10, 2019, 10:15 am

Hi, I have a passion for trading but minimal knowledge in the Foreign Exchange field but I am really keen to get involved but I want to start off with a demo account but I believe this will be a great insight for me to watch and learn how others interpret the market and I am intrigued to see the technical analysis data.

Hope to hear back from you.

Kind Regards,
- Dodgygeez
