Thread: [Leaking some stuff from my private collection](#)

DoubleClutch - September 2, 2019, 5:35 pm

I made my first account on HF somewhere around 2010, and sharing was rampant. Unfortunately it looks like things have been cracked down in the the years since, but I still want to share with the community for all I've learned here over the years. So without further ado, here's what I've decided to share today.

[ATM Stuff](#)

[Doctors Notes/Other stuff to excuse you from work or school](#)

[11 Hacking Tools supposedly in use by the feds.](#)

[Dicebot \(Auto-Gambler\)](#)

[Cracked BLPRO](#)

[Hidden Backdoor, \(Retain Access\)](#)

[BlackWindow V2](#)

[DroidJack](#)

[Bitcoin Blackmailer](#)

[Antidetect](#)RUN ALL OF THESE IN SANDBOX MODE IF YOU DO AT ALL! I'd have posted virus scans but the very nature of most of this stuff dictates that there would be false positives, but for real, I'm a new user, always run anything a new user posts in sandbox mode til you know for sure they can be trusted. Also, I can't promise that I'll have Mega Pro for very much longer, I'm a bit financially fucked right now so definitely get what you want while i've still got the transfers for it!

Happy hunting, all.

just wondering what is cracked bl pro?

DoubleClutch - September 2, 2019, 9:07 pm

Its a cracked version of BL Pro, which is an awesome android emulator.

BlueStacks? Or another one, cause I'm coming up empty when looking it up lol. If it's BlueStacks, I thought there was only the one version.

Dicebot is used for automating dice based crypto gambling games, using strategies and learning as it goes to help potentially turn a profit
